oneSCM – Managing Contracts in Daily Operations

oneSCM *for Cars*

Purpose and benefit

You **search for contracts**, change **contract, customer and payment data**, carry out **change of payer and transfer**, **suspend and reactivate**, extend or **close** contracts and use the **change history** (Chapter 10.1 to 10.8).

10

Chapter 10 of 23

Administration

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

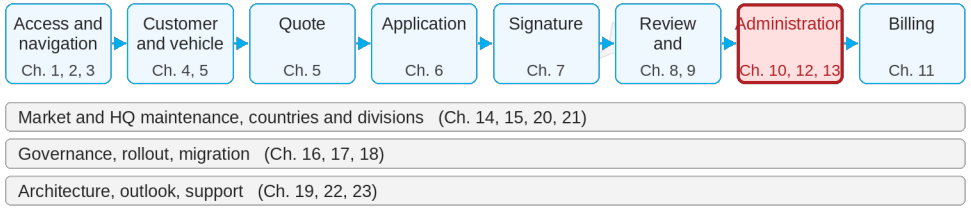

10.1 – 10.4 Changing

- Searching for contracts and checking details
- Changing contract, customer and payment data
- Change of payer and contract transfer
- Suspend and reactivate

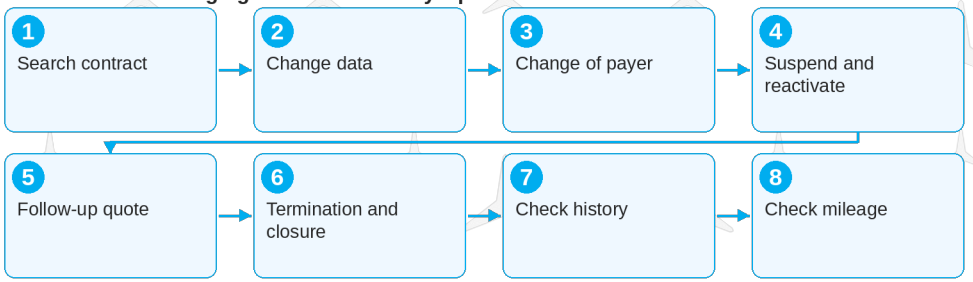

10.5 – 10.9 Ending and tracing

- Extension, follow-up quote and follow-up contract
- Termination, cancellation and closure
- Financial consequences and closing evidence
- Change history and traceability
- Mileage, mileage history and projection

oneSCM process map – position of Chapter 10

Process view: Managing Contracts in Daily Operations

How to proceed

1. Search for the contract via reference number, VIN or customer and check the **details** (10.1).
2. Change **contract, customer or payment data** via the permitted actions (10.2); the payment interval can later only be changed to "one-time".
3. Carry out a **change of payer** or **contract transfer** with the required evidence (10.3).
4. **Suspend** or **reactivate** for legitimate reasons (10.4).

> ! **Changes to product, term or mileage require a new contract.** Cancellations and closures have financial consequences (Chapter 11.6) and are irreversible.

5. Before the end of the term, create a **follow-up quote** or a **follow-up contract** (10.5).
6. For **termination, cancellation or closure**, check the **financial consequences** and secure the **closing evidence** (10.6 and 10.7).
7. Check the **change history** (10.8); every change is traceable with time, role and reason.
8. Check the **mileage history** and trigger the **mileage projection** when MIC data is missing (10.9); it is a reference value and does not end the contract.

Note: This Quick Guide summarizes Chapter 10 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM *for Cars*

Roles and prerequisites

Roles involved

- **Dealer**: initiate changes, create follow-up quotes
- **MO**: review of changes (Chapter 9.7)
- **Finance department**: financial consequences and evidence

Prerequisites

- Contract is active (Chapter 8)
- Reason and time of the change are known
- Customer consent is available where required

Checklist before completion

- ☐ Contract uniquely identified
- ☐ Permitted change selected, evidence available
- ☐ Financial consequences checked
- ☐ Change documented in the history

Notes and pitfalls

- Changes go through the MO Check according to Chapter 9.7.
- A mileage from a workshop invoice above the contract mileage sets the status "expired by mileage" (10.6).
- The history is the basis for reporting and governance (Chapter 16).

Frequently asked questions and answers

- **Can I increase the mileage?** Not in the current contract; this requires a new contract or follow-up contract (10.2 and 10.5).
- **What is the difference between cancellation and termination?** Cancellation voids the contract, termination ends it at a set date; both have their own financial consequences (10.6 and 10.7).
- **Where can I see who changed something?** In the contract's change history (10.8).

Important links and contacts

- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- Calculation examples and finance reference – Appendix I.2.
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).
