# oneSCM – Tyre Products – Tyres

oneSCM *for Vans*

## Purpose and benefit

You position **tyre products** relative to the standard process, select **product, tyre type and tyre size**, configure **term, mileage and scope of services**, check **price, options and campaigns**, carry out **application, documents and activation** and manage the contract through to **termination** (Chapter 13.1 to 13.7).

**13**

**Chapter 13 of 23**

Administration

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

## Topics at a glance

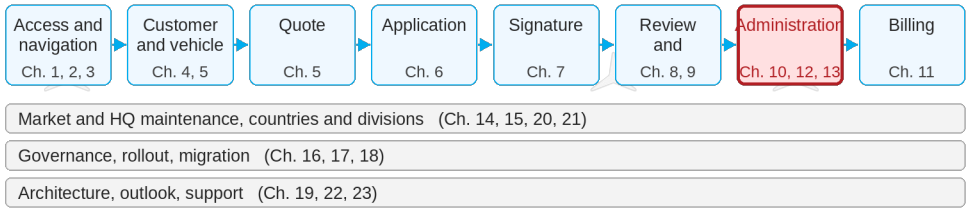

### 13.1 – 13.4 Product

- Positioning and distinction from the standard process
- Product, tyre type and tyre size
- Term, mileage and scope of services
- Price, options and campaigns

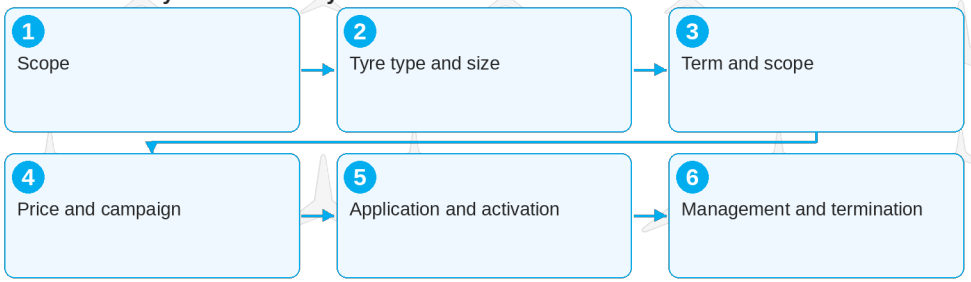

### 13.5 – 13.7 Contract

- Application, documents and activation
- Ongoing management and claiming services
- Renewal and termination

**oneSCM process map – position of Chapter 13**

**Process view: Tyre Products – Tyres**

## How to proceed

1. Recognize the **distinction** (13.1): tyre products follow the standard process but have their own product and price parameters.
2. Select the **tyre product** as well as **tyre type** and **tyre size** matching the vehicle (13.2).
3. Configure **term, mileage and scope of services** (13.3) and check **price, options and campaigns** (13.4).

> ! **Tyre size and tyre type must match the vehicle equipment.** Deviations lead to rejection in the MO Check and prevent services from being claimed.

4. Create the **application**, obtain the signature and upload the documents (13.5, as in Chapters 6 to 8).
5. During the active contract, **services are claimed** via the workshop (13.6).
6. Before the end of the term, check **renewal** or **termination** (13.7).

**Note**: This Quick Guide summarizes Chapter 13 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

# oneSCM – Tyre Products – Tyres

oneSCM *for Vans*

## Roles and prerequisites

**Roles involved**

- **Dealer**: offer, apply for and manage tyre contracts
- **Market**: maintain tyre products, sizes and prices
- **MO**: check and activation

**Prerequisites**

- Vehicle data loaded (Chapter 5)
- Tyre type and tyre size of the vehicle known
- Tyre product is released in the market

## Checklist before completion

- ☐ Tyre product available in the market
- ☐ Tyre type and size correct
- ☐ Term and mileage configured
- ☐ Application activated, services can be claimed

## Notes and pitfalls

- Technical options and coverage codes are maintained centrally (Chapter 15.7).
- Observe division differences Cars/Vans (Chapter 21).
- Campaigns for tyre products depend on market and time (Chapter 14.13).

**Frequently asked questions and answers**

- **Can I combine tyres and service in one contract?** This depends on the market's product offering (Chapters 13.1 and 14.8).
- **Where does the tyre size come from?** From the vehicle data; check it against the actual equipment (13.2).
- **How are services claimed?** Via the workshop with reference to contract and coverage (13.6 and 19.9).
