oneSCM – Introduction and Overview

oneSCM for Vans

Purpose and benefit

oneSCM is the central system for service contract and maintenance products. This guide shows **what oneSCM is used for**, which **roles** work together and how the **global standard** interacts with **local variants** per market (Chapter 1.1 to 1.6).

1

Chapter 1 of 23

Access and navigation

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

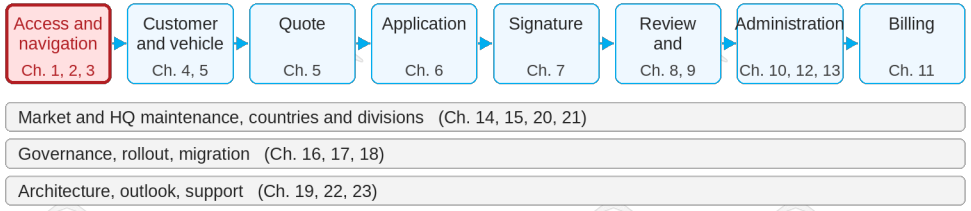

1.1 – 1.3 Goals and roles

- Goals and benefits of oneSCM
- Project background and context
- Roles involved and tasks

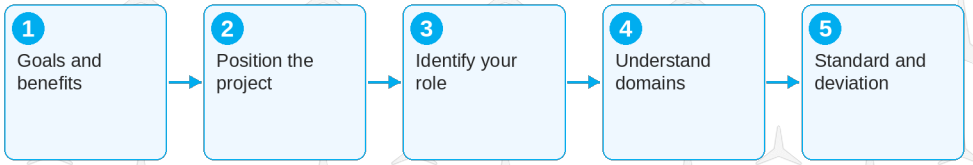

1.4 – 1.6 Ecosystem and standard

- Roles in the oneSCM ecosystem
- Business domains and collaboration
- Global standard and local variants

oneSCM process map – position of Chapter 1

Process view: Introduction and Overview

How to proceed

1. Read **Goals and benefits** (1.1): oneSCM combines price information, quote, application, contract and management in one system.
2. Position the project (1.2): oneSCM replaces legacy systems and maps the contract process for **Cars and Vans** uniformly.
3. Identify your **role** (1.3 and 1.4) and the related chapters:
   - Dealer: Chapters 4 to 8 and 10
   - MO: Chapters 9 and 10
   - Market: Chapter 14
   - HQ: Chapter 15

> ! **Country-specific deviations** from the Blueprint are only valid if they are documented and approved in the country deviation register (Chapter 20.6).

4. Understand the **business domains** (1.5): customer, vehicle, product, contract, payment and document are interlinked.
5. Note **standard and deviation** (1.6): The Blueprint applies globally; country deviations are documented in the register (Chapter 20).

Note: This Quick Guide summarizes Chapter 1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Introduction and Overview

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer** (dealership): quote, application, Application Management
- **MO** (Market Operation): business review and activation
- **Market**: product, price and campaign maintenance, administration
- **HQ**: Blueprint, global standards, central master data

Prerequisites

- Access to oneSCM via RetailPortal or direct link (Chapter 2)
- Knowledge of your own market, division and dealership context
- Handbook Chapter 1 as an entry point before all process chapters

Checklist before completion

- ☐ Own role and market are known
- ☐ Relevant handbook chapters are identified
- ☐ Access to oneSCM is requested or available
- ☐ Glossary and process map are known

Notes and pitfalls

- Terms and abbreviations (MO, HQ, OTR, VIN, ZB I) can be found in the glossary (Appendix A).
- The process map (Chapter 3.4) shows the order of the process chapters.
- Reading paths per role are in the preface (V.2).

Frequently asked questions and answers

- **What does oneSCM stand for?** For central Service Contract Management: quote, application, contract and management of service and maintenance products.
- **Does the handbook apply to Cars and Vans?** Yes. Division differences are described in Chapter 21, country differences in Chapter 20.
- **Where do I start as a new user?** With Chapter 2 (access) and Chapter 3 (navigation), then with the process chapter for your role.

Important links and contacts

- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- oneSCM RetailPortal – System news and training material.
- Glossary – Appendix A with terms and abbreviations.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Access, Roles and Authorizations

oneSCM *for Vans*

Purpose and benefit

You log in via **Single Sign-on**, check your **business role** and **technical authorizations**, and know how to **request** missing rights and solve access issues (Chapter 2.1 to 2.6).

2

Chapter 2 of 23

Access and navigation

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

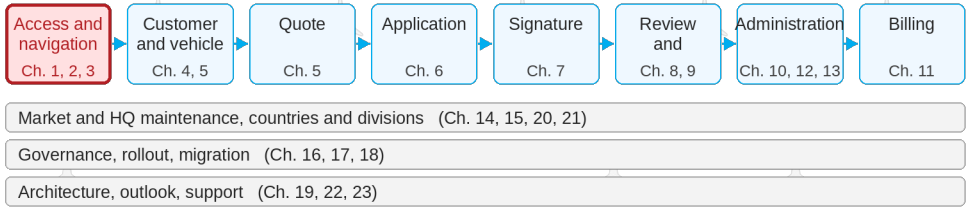

2.1 – 2.3 Login and roles

- Login and Single Sign-on
- Business roles and technical authorizations
- Authorization request and approval

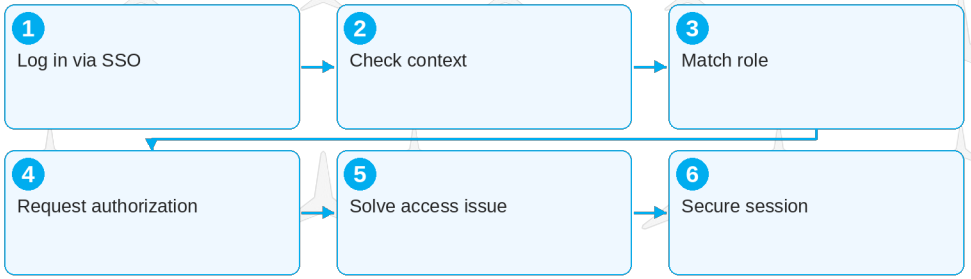

2.4 – 2.6 Context and security

- Check market, division and dealership context
- Missing authorizations and access issues
- Secure handling of user account and session

oneSCM process map – position of Chapter 2

Process view: Access, Roles and Authorizations

How to proceed

1. Open oneSCM via RetailPortal or via the direct link. Login is via **Single Sign-on** (2.1).
2. After login, check your **market, division and dealership context** (2.4): A wrong context means wrong products and prices.
3. Match your **business role** against your **technical authorizations** (2.2). Missing menu items indicate missing roles.

> ! **Authorizations are never granted by e-mail or verbal request.** Every role is requested, reviewed and approved via ALICE; the approval is documented traceably.

4. If an authorization is missing, submit the **authorization request** via ALICE (2.3). In the dealership, the **ALICE dealership admin** grants access.
5. For access issues (2.5): clear the browser cache, log in again, then report a support case with user ID and screenshot.
6. Lock your session when away and never share your account with others (2.6).

Note: This Quick Guide summarizes Chapter 2 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Access, Roles and Authorizations

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **User**: login, context check, authorization request
- **ALICE dealership admin**: activation of roles in the dealership
- **Market/HQ**: role model and approvals

Prerequisites

- Valid user account in the corporate directory
- Assigned oneSCM role (e.g. oneSCM.DealerVAN)
- Access via RetailPortal or direct link

Checklist before completion

- ☐ Login via SSO works
- ☐ Market, division and dealership are correct
- ☐ All required menu items are visible
- ☐ Contact person for ALICE is known

Notes and pitfalls

- The oneSCM.DealerVAN role is a prerequisite for application creation in the Vans business.
- After a role change, you need to log in again.
- Multiple markets or divisions require multiple role assignments.

Frequently asked questions and answers

- **Why can't I see the Contract Creation menu item?** The related role is missing. Request it via ALICE from your dealership admin.
- **How long does an approval take?** Approval is given by the responsible admin; you can see the current status in the authorization request.
- **Can I have multiple roles?** Yes, for example Dealer roles for Cars and Vans; the active context is shown in oneSCM.

Important links and contacts

- ALICE – authorization management – Role request and approval (Chapter 19.16).
- oneSCM RetailPortal – System news and training material.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 2 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Basics, Navigation and Customer Journey

oneSCM *for Vans*

Purpose and benefit

You find your way around the **start page and menu**, use **search and filters**, know the **interaction patterns** and place the contract process from **price information** to **contract** on the **process map** (Chapter 3.1 to 3.9).

3

Chapter 3 of 23

Access and navigation

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

3.1 – 3.3 User interface

- Start page and menu
- Search and filters
- UI elements and interaction patterns

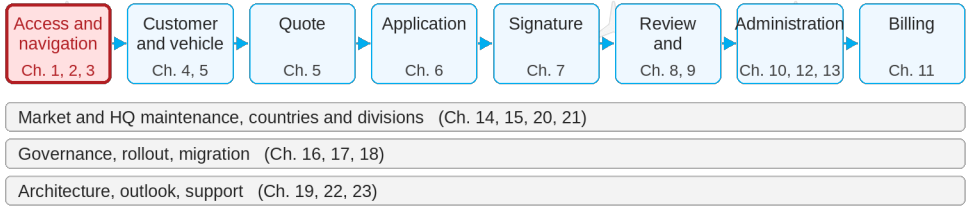

3.4 – 3.6 Customer Journey

- Process map
- Price information, quote, application and contract
- Lead and CRM handover

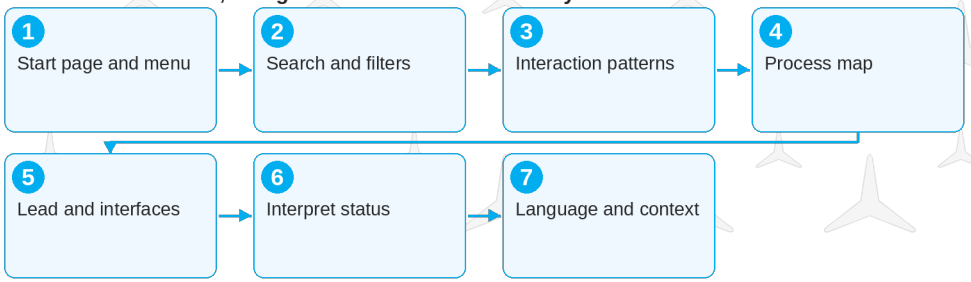

3.7 – 3.9 Status and context

- Interfaces and system handovers
- Interpreting status information correctly
- Personal work context and languages

oneSCM process map – position of Chapter 3

Process view: Basics, Navigation and Customer Journey

How to proceed

1. Start on the **start page** (3.1): The tiles lead to **Contract Creation**, **Application Management**, **Customer Management** as well as warranty packages and external portals.
2. Use **search and filters** (3.2): reference number, VIN, customer name or status narrow down lists. Columns such as "Actions" are reached via the horizontal slider.
3. Recognize the **interaction patterns** (3.3): step bar with check marks, toggles for optional entries, three-dot menu for actions, mandatory fields marked with an asterisk.
4. Place your case on the **process map** (3.4 and 3.5): price information → quote → application → contract.

! **A green check mark in the step bar does not mean that the contract is active.** Only the contract status "active" after review and activation (Chapter 8) is binding.

5. Take over **leads** from the CRM and return results (3.6); note the **system handovers** to OTR, VEGA and oneERP (3.7).
6. Read **status information** correctly (3.8): application status, signature status and contract status are separate values.
7. Set your **work context and language** (3.9); documents follow the market's language variant (Chapter 7.4).

Note: This Quick Guide summarizes Chapter 3 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Basics, Navigation and Customer Journey

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: navigation, search, understanding status
- **Dealer**: customer journey from lead to contract
- **MO/Market**: status information and system handovers

Prerequisites

- Successful login with correct context (Chapter 2)
- Basic knowledge of the process map
- Personal work context and language are set

Checklist before completion

- ☐ Start page and main menu are known
- ☐ Search by reference number and VIN works
- ☐ Process phase of the case is clear
- ☐ Language and work context are set

Notes and pitfalls

- The status overview with permitted transitions is in Chapter 8.2 and Appendix D.
- The search only finds cases in your own market and dealership context.
- Wizards end uniformly with the step "Overview & Confirmation"; market names appear in the language of the market settings (3.3, 3.9).

Frequently asked questions and answers

- **Where can I find a saved application again?** Under Contract Creation › Application Management via the reference number (Chapter 8.1).
- **What is the difference between a quote and an application?** The quote is non-binding price information; the application is saved, signed, reviewed and activated.
- **Can I use the interface in another language?** Yes, via the personal work context (3.9); contract documents follow the market's language variants.

Important links and contacts

- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- Process diagrams – Appendix C with process map and sub-processes.
- Glossary – Appendix A with terms and abbreviations.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 3 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Customers, Partners and Contract Roles

oneSCM *for Vans*

Purpose and benefit

You distinguish **private and business customers**, find **existing customers**, check **mandatory data**, assign the **contract roles** (holder, payer, user, contact, invoice recipient) and avoid **duplicates** (Chapter 4.1 to 4.8).

4

Chapter 4 of 23

Customer and vehicle

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

4.1 – 4.3 Entering customers

- Private customers and business customers
- Searching for and assigning existing customers
- Checking customer data and mandatory data

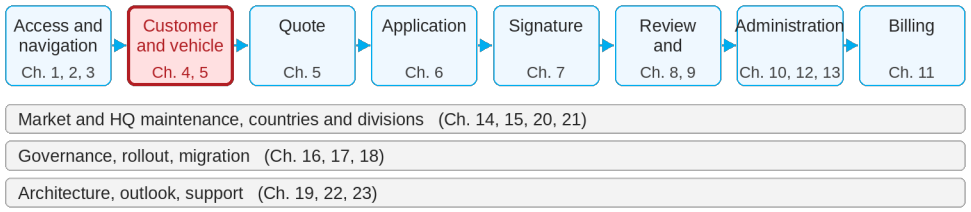

4.4 – 4.6 Roles and quality

- Contract holder, payer, user, contact, invoice recipient
- Data transfer from connected systems
- Duplicates and conflicting master data

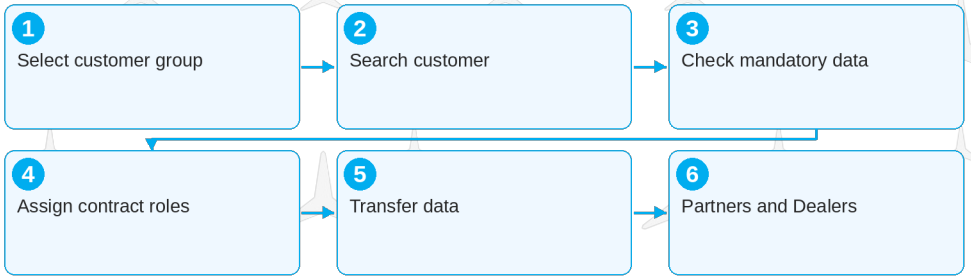

4.7 – 4.8 Partners

- Partner and Dealer relationships
- Dealer onboarding and partner process

oneSCM process map – position of Chapter 4

Process view: Customers, Partners and Contract Roles

How to proceed

1. Select the **customer group** (4.1). "KAM-managed key accounts" only for individual price requests or FS 140+.
2. First **search** for the customer and select them; only create a new record if needed (4.2). Identification is based on:
   - Private customer: first and last name, phone number, e-mail address or Mercedes me ID
   - Business customer: company name, VAT ID
3. Check **mandatory data** and plausibility (4.3): address, contact details, legal form; errors block later checks.

> ! **Contract holder and registered keeper of the vehicle must be identical.** A different contract holder is not permitted; only payer and invoice recipient may differ.

4. Assign the **contract roles** (4.4): contract holder, payer, user, contact and invoice recipient may differ, but must be permitted per market.
5. Transfer data from **connected systems** (4.5, e.g. oneERP) instead of retyping it; check for **duplicates** and conflicts (4.6).
6. Maintain **partner and Dealer relationships** (4.7); new dealers go through **Dealer onboarding** (4.8).

Note: This Quick Guide summarizes Chapter 4 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Customers, Partners and Contract Roles

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: customer search, new creation, role assignment
- **MO**: review of master data and duplicates
- **Market**: Dealer onboarding and partner process

Prerequisites

- Customer group is known (private, business, KAM-managed key accounts)
- Customer identification data is available
- Data protection notes are observed (Chapter 16.1)

Checklist before completion

- ☐ Customer searched, no duplicate created
- ☐ Customer group selected correctly
- ☐ Mandatory data complete and plausible
- ☐ Contract roles assigned and permitted

Notes and pitfalls

- Duplicates usually result from creating new records without searching first; the MO can reject them.
- Personal data does not belong in comments or screenshots (Chapter 16.1).
- When transferring data from external systems, the leading system is authoritative (Chapter 16.2).

Frequently asked questions and answers

- **May the payer differ from the contract holder?** Yes, the payer and the invoice recipient may differ; the contract holder must be the registered keeper.
- **What to do about conflicting master data?** Do not overwrite; document the deviation and pass it to the leading system or to support (Chapter 4.6).
- **How is a new Dealer connected?** Via the partner process and the market's Dealer onboarding (Chapter 4.8).

Important links and contacts

- Customer Account Center – Customer accounts and special cases (Chapter 12.8).
- oneERP – Customer and finance integration (Chapter 19.11).
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 4 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Preparing Vehicle, Product and Quote

oneSCM *for Vans*

Purpose and benefit

You select the **contract type** and **entry point**, load **vehicle data**, select **product and scope of services**, configure **term, mileage and options** and create a **quote** with campaigns and discounts (Chapter 5.1 to 5.8).

5

Chapter 5 of 23

Customer and vehicle

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

5.1 – 5.3 Vehicle

- Contract types and entry points
- Vehicle and case identifiers
- Vehicle data, mandatory fields and validation rules

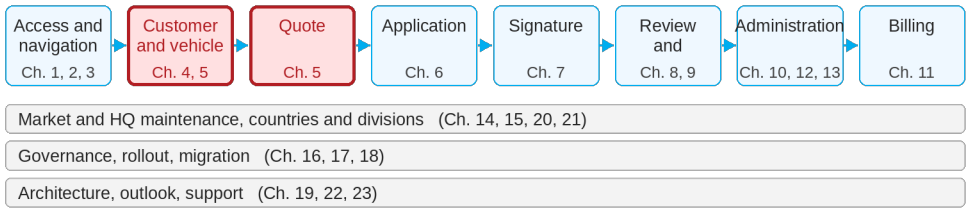

5.4 – 5.6 Product and price

- Selecting products and scope of services
- Configuring term, mileage and options
- Prices, campaigns and discounts in the quote

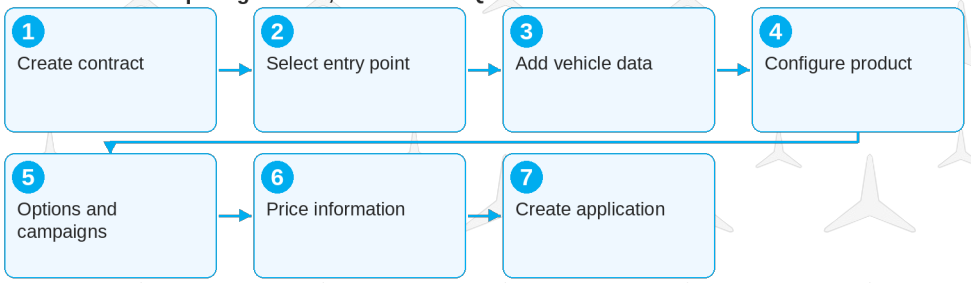

5.7 – 5.8 Quote

- Quote validity and changes
- Handover to application creation

oneSCM process map – position of Chapter 5

Process view: Preparing Vehicle, Product and Quote

How to proceed

1. Click "**Create contract**" and select the **contract type** (5.1).
2. Depending on the phase, enter the appropriate **entry point** to load the vehicle data (5.2):
   - For a price indication: **model series**
   - From quote: OTR **deal ID**
   - From order: VerSO **order ID**
   - From production: **VIN**
3. Add **first registration**, **current mileage** or **license plate** (5.3). If these are not yet known, activate the toggle.
4. Select the **service/maintenance package** (5.4) and configure **payment interval, term, annual mileage** and, if applicable, **industry** (5.5).

! **As soon as you click "Create application", you jump to customer data entry** and can only edit the contract again later. Check product, term and mileage beforehand.

Note: This Quick Guide summarizes Chapter 5 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Preparing Vehicle, Product and Quote

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: create and hand over quote
- **Market**: provide products, prices and campaigns (Chapter 14)
- **MO**: review for special approvals

Prerequisites

- Customer is created or assigned (Chapter 4)
- Vehicle identifier is available: model series, OTR deal ID, VerSO order ID or VIN
- Permitted products for market and division are known

Checklist before completion

- ☐ Entry point selected to match the phase
- ☐ Vehicle data loaded and mandatory fields checked
- ☐ Product, term and mileage match the customer's wishes
- ☐ Campaign permitted, price information generated

Notes and pitfalls

- The payment intervals "one-time" and "monthly" are always available; other intervals depend on customer segment and term.
- Model series with six, seven and eight digits are accepted; contingent products (sales logic "FRD Not Related") are found via the model series, not via the VIN (5.4).
- If the identifier returns no products, check the first registration date and mileage: vehicles above the product's maximum age or maximum mileage receive no results (5.3).
- Demonstrator and company cars count as used vehicles; only a pure maintenance package is possible for them.

How to proceed (continued)

5. If available, add **technical options** and **additional services** and select **active campaigns** or **your own dealer discounts** (5.6). Check eligibility against the campaign description.
6. Check the contract details in the **payment plan** and generate the "**Price information**" preview (PDF) for quote purposes. Note the **quote validity** (5.7).
7. With "**Create application**" you hand over the quote to application creation (5.8, Chapter 6).

Frequently asked questions and answers

- **Which identifier do I use before the order?** The model series for a price indication; from quote the OTR deal ID, from order the VerSO order ID.
- **Can I change a quote later?** Yes, until application creation; after that the change rules from Chapter 5.7 and 10.2 apply.
- **How long is a quote valid?** Validity depends on market requirements and price version (Chapter 5.7 and 14.9).

Important links and contacts

- OTR – Order and vehicle reference (Chapter 19.5).
- MIC – Vehicle data API (Chapter 19.8).
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 5 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Creating a Service Contract and Completing the Application

oneSCM *for Vans*

Purpose and benefit

You check **prerequisites and contract type**, enter **contract data and mandatory fields**, check **customer, vehicle and product assignment**, understand **validation rules** and save the **application** with a **reference number** (Chapter 6.1 to 6.7).

6

Chapter 6 of 23

Application

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

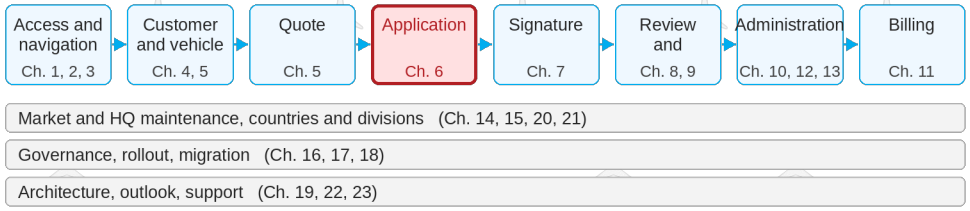

6.1 – 6.3 Entering

- Checking prerequisites and contract type
- Entering contract data and mandatory fields
- Checking customer, vehicle and product assignment

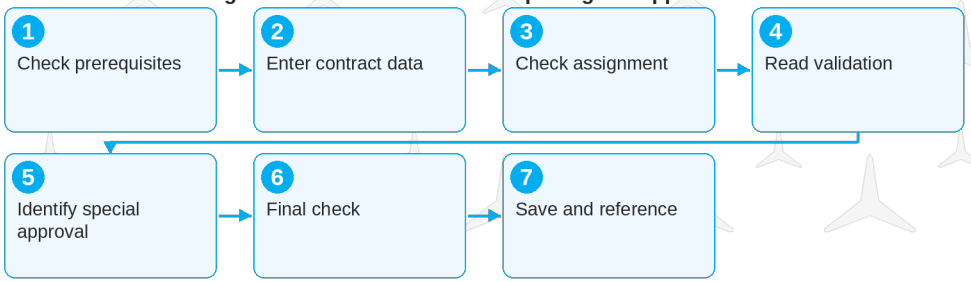

6.4 – 6.7 Checking and saving

- Validation rules and error messages
- Identifying special approvals in the standard process
- Overview and final check
- Saving the application and checking the reference

oneSCM process map – position of Chapter 6

Process view: Creating a Service Contract and Completing the Application

How to proceed

1. Check **contract type and prerequisites** (6.1): vehicle, product and customer group must match the contract type.
2. Enter the **contract data** (6.2): mandatory fields are marked with an asterisk; missing entries block saving.
3. In the **payment plan** section, check the assignment of **customer, vehicle and product** (6.3) and use the **application preview** (PDF).
4. Read **validation messages** (6.4): red messages must be resolved; yellow notes allow you to continue.

! **The payment interval can later only be changed to "one-time"**; other changes require a new contract.

5. Identify **special approvals** (6.5): deviating conditions or customer groups trigger an MO review (Chapter 9 and 12.4).
6. Carry out the **final check** in the overview (6.6) and click the **check mark** to proceed to signing.
7. **Save** the application and note the **reference number** (6.7); it is the key for Application Management and support.

Note: This Quick Guide summarizes Chapter 6 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Creating a Service Contract and Completing the Application

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: enter, check and save application
- **MO**: special approvals and review (Chapter 9)
- **Market**: validation rules per market

Prerequisites

- Quote is prepared (Chapter 5)
- Customer is assigned (Chapter 4)
- Role for application creation is activated (Chapter 2)

Checklist before completion

- ☐ Contract type and prerequisites checked
- ☐ Mandatory fields complete, no red messages
- ☐ Customer, vehicle and product assigned correctly
- ☐ Application saved, reference number noted

Notes and pitfalls

- In the handbook example, an application is submitted for a business customer; deviations for private customers and KAM-managed key accounts are marked.
- You activate a collective invoice during the customer data check via the toggle at the bottom of the page.
- Saved applications can be found under Application Management (Chapter 8.1).

Frequently asked questions and answers

- **Can I change the application after saving?** To a limited extent: first registration, license plate and documents via "Update" (Chapter 8.3); conditions require a new contract.
- **What does a special approval mean?** The application deviates from the standard and is reviewed by the MO before it can be activated (Chapter 9 and 12.4).
- **Where can I see the reference number?** In the overview after saving and in the first column of Application Management.

Important links and contacts

- Transition module T6-7 – From saved application to payment data and signature.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 6 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Payment Data, Documents and Signature

oneSCM *for Vans*

Purpose and benefit

You enter **payment method and payment interval**, **payer and invoice recipient**, **bank details and mandates**, generate the **contract documents** in the correct language and obtain the **signature** digitally or manually (Chapter 7.1 to 7.8).

7

Chapter 7 of 23

Signature

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

7.1 – 7.3 Payment

- Payment methods and payment intervals
- Contract payer and invoice recipient
- Bank details and mandates

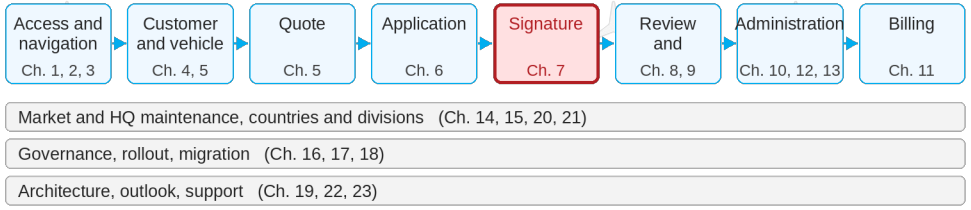

7.4 – 7.6 Documents and signature

- Contract documents and language variants
- Digital signature
- Manual signature and document upload

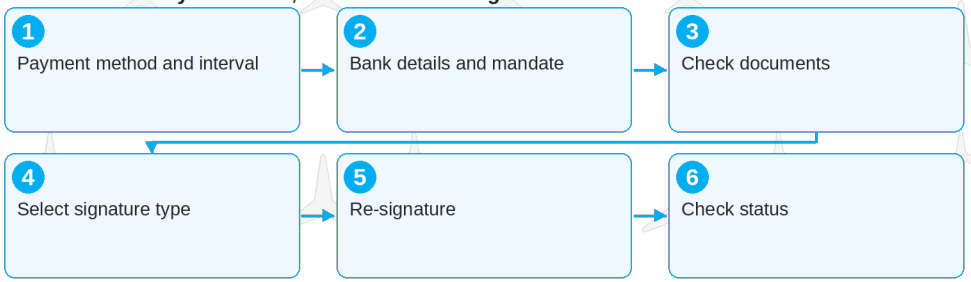

7.7 – 7.8 Checking

- Multiple signatures and re-signature
- Checking signature, document and application status

oneSCM process map – position of Chapter 7

Process view: Payment Data, Documents and Signature

How to proceed

1. Select **payment method and payment interval** (7.1) and define **payer and invoice recipient** (7.2).
2. Enter **bank details** and generate the **SEPA mandate** (7.3); for a collective invoice, activate the toggle.
3. Generate the **application preview** (PDF) and check the **language variant** of the documents (7.4).

> ! **For contract review and activation, first registration, license plate and a copy of the ZB II must be available.** For the print variant, contract documents and SEPA mandate must be uploaded separately.

4. Select the **signature type** (7.5 and 7.6):
   - **E-signature (QR code)**: customer scans the code, signs on mobile; filed automatically.
   - **Signature by e-mail**: link by e-mail, access with 4-digit SMS code; filed automatically.
   - **Print document**: handwritten signature, then scan and "Upload application".
5. For multiple signatories or changes, obtain the **signature again** (7.7).
6. Check **signature, document and application status** (7.8) before moving on to the activation check (Chapter 8).

Note: This Quick Guide summarizes Chapter 7 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Payment Data, Documents and Signature

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: enter payment data, obtain signature, upload documents
- **Customer**: signing via QR code, e-mail or on paper
- **MO**: review of signature and document status

Prerequisites

- Application is saved (Chapter 6)
- Customer e-mail and mobile number are stored in the customer master
- Payer's bank details are available

Checklist before completion

- ☐ Payment method, interval, payer and invoice recipient entered
- ☐ SEPA mandate generated or uploaded
- ☐ Documents in the correct language variant
- ☐ Signature status "signed" checked

Notes and pitfalls

- With digital signing, the contract is sent to the customer automatically.
- The print variant is suitable when several signatures are required or when no digital signature is possible.
- Alternatively, the contract document can be opened on a computer via the link.

Frequently asked questions and answers

- **The customer has no mobile number on file. What now?** The e-mail variant requires SMS verification; use the e-signature via QR code or the print variant.
- **Can a document be uploaded later?** Yes, via Application Management › Update › Communication (Chapter 8.3).
- **What happens with a re-signature?** The previous document is replaced; the signature status starts over (Chapter 7.7).

Important links and contacts

- Transition module T7-8 – From documents and signature to the activation check.
- MPay – Payment integration (Chapter 19.15).
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 7 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Tracking and Activating the Application

oneSCM *for Vans*

Purpose and benefit

You **search and filter applications**, read the **status overview**, add **missing vehicle data and documents**, know the **activation prerequisites** and respond correctly to **rejection, delay and resubmission** (Chapter 8.1 to 8.7).

8

Chapter 8 of 23

Review and activation

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

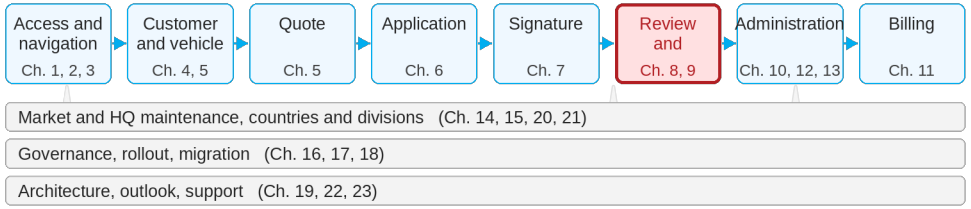

8.1 – 8.3 Tracking

- Searching, filtering and tracking applications
- Status overview and permitted transitions
- Adding missing vehicle data and documents

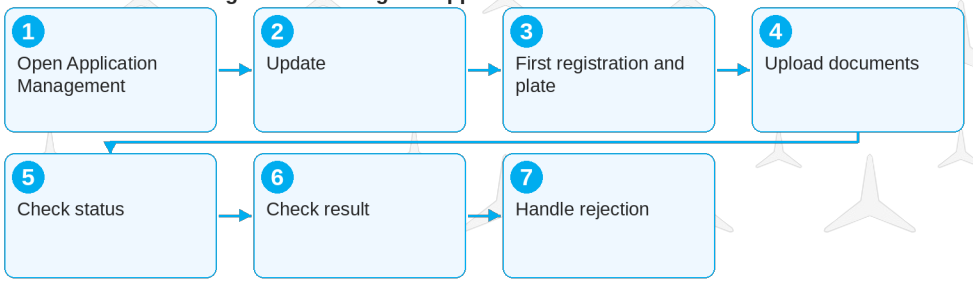

8.4 – 8.7 Activating

- Approval process and activation prerequisites
- Automatic and manual activation variants
- Checking activation and result
- Rejection, delay and resubmission

oneSCM process map – position of Chapter 8

Process view: Tracking and Activating the Application

How to proceed

1. Under **Contract Creation**, click "**Application Management**" and search for the application via the **reference number** (8.1).
2. Move the slider to the right to the "**Actions**" column, click "**…**" and select "**Update**".
3. Enter the **first registration date** and **license plate** (8.3).
4. Open the application via the reference number, switch to the "**Communication**" tab and use the upload icon to upload the copy of the **ZB I/ZB II** or the signed contract document.

! **Uploading the ZB II is not a mandatory field in the system, but no activation takes place without the document.** Incorrect applications are rejected and the customer is informed.

5. Check the **status overview** (8.2): only permitted transitions are possible; the application is reviewed and activated by Customer Management (8.4 and 8.5).
6. Check the **result** (8.6): contract status "active" and feedback in Communication.
7. In case of **rejection**, Customer Management will contact you; correct the data and resubmit the application (8.7).

Note: This Quick Guide summarizes Chapter 8 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Tracking and Activating the Application

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: track application, submit missing data and documents
- **MO/Customer Management**: review, approval and activation
- **System**: automatic activation when data is complete

Prerequisites

- Application is saved and signed (Chapter 6 and 7)
- Reference number is available
- First registration, license plate and ZB II are available

Checklist before completion

- ☐ Application found in Application Management
- ☐ First registration and license plate entered
- ☐ ZB II and contract document uploaded
- ☐ Contract status "active" checked

Notes and pitfalls

- A service contract can be concluded up to 12 months and/or a maximum of 50,000 km after first registration, provided the vehicle has not yet received a service (exception: company and demonstrator vehicles with a previous owner).
- The contract start corresponds to the date of first registration.
- Status transitions are documented as a matrix in Appendix D.

Frequently asked questions and answers

- **How long does activation take?** With complete data, automatic activation takes place promptly; manual reviews by Customer Management take correspondingly longer (8.5).
- **My application was rejected. What to do?** Read the rejection reason in Communication, correct the data and resubmit the application (8.7).
- **Can I filter by status?** Yes, Application Management offers filters by status, date and customer (8.1).

Important links and contacts

- Transition module T8-9 – Overall process and MO role deep dive.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 8 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – MO Checks and Business Reviews

oneSCM *for Vans*

Purpose and benefit

You know the **tasks and scope of the MO role**, carry out **MO Checks** within contract creation, assess **check status and reasons**, ensure **quality**, handle **deviations** and hand over to **decision or support** (Chapter 9.1 to 9.8).

9

Chapter 9 of 23

Review and activation

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

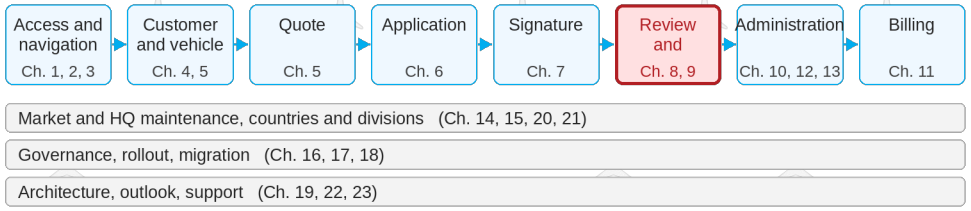

9.1 – 9.4 Review

- Tasks and scope of the MO role
- MO Checks within contract creation
- Check status, reasons and open checks
- Quality assurance and system checks

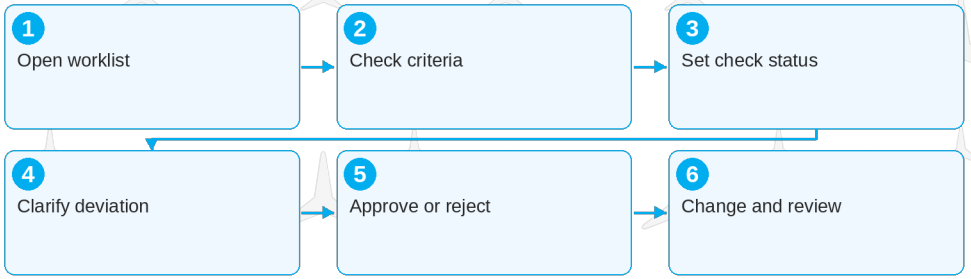

9.5 – 9.8 Result

- Deviations and re-check
- Handover for decision or to support
- MO Checks for contract changes
- Contract Review: profiles and overview

oneSCM process map – position of Chapter 9

Process view: MO Checks and Business Reviews

How to proceed

1. Open the **MO Check worklist** and select the application (9.2).
2. Check **vehicle data, customer data, documents and signature** against the check criteria (9.2 and 9.4); system checks indicate deviations.
3. Set the **check status** and enter the **reason** (9.3). Open checks remain visible in the worklist.

> ! **A rejection is only permitted with a comment.** The reason must be comprehensible for the Dealer and is saved in the history.

4. In case of **deviations**, request corrections from the Dealer and check again (9.5).
5. **Approve** or **reject**; hand over disputed cases for decision or to support (9.6).
6. Check **contract changes** by the same rules (9.7) and use the **Contract Review profiles** for the overview (9.8).

Note: This Quick Guide summarizes Chapter 9 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – MO Checks and Business Reviews

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **MO** (Market Operation): business review, approval, rejection
- **Dealer**: subsequent delivery of data and documents
- **HQ/Market**: check rules and Contract Review profiles

Prerequisites

- MO role is activated (Chapter 2)
- Application is signed and fully submitted (Chapter 7 and 8)
- The market's check criteria are known

Checklist before completion

- ☐ All check criteria assessed
- ☐ Check status and reason entered
- ☐ Deviations documented and reported back
- ☐ Decision approved or rejected

Notes and pitfalls

- The MO reviews business aspects; technical faults go to support (Chapter 23).
- Comments are visible internally or externally; check the visibility before saving (Chapter 12.7).
- Checks are part of the approval workflow according to Chapter 16.3.

Frequently asked questions and answers

- **What exactly does the MO check?** Completeness and plausibility of customer, vehicle, product, payment data, documents and signature (9.2 and 9.4).
- **Can the Dealer see the check status?** Yes, in Application Management as a status and in Communication as feedback.
- **How often can a re-check be done?** As often as corrections are submitted; every check is traceable in the history (9.5).

Important links and contacts

- Transition module T9-10 – From check result to ongoing contract management.
- Role/status/scope matrices – Appendix D.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 9 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Managing Contracts in Daily Operations

oneSCM *for Vans*

Purpose and benefit

You **search for contracts**, change **contract, customer and payment data**, carry out **change of payer and transfer**, **suspend and reactivate**, extend or **close** contracts and use the **change history** (Chapter 10.1 to 10.8).

10

Chapter 10 of 23

Administration

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

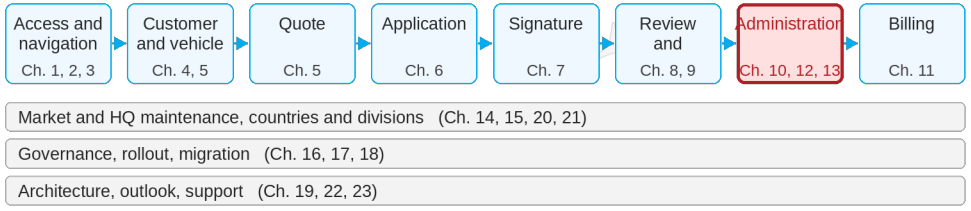

10.1 – 10.4 Changing

- Searching for contracts and checking details
- Changing contract, customer and payment data
- Change of payer and contract transfer
- Suspend and reactivate

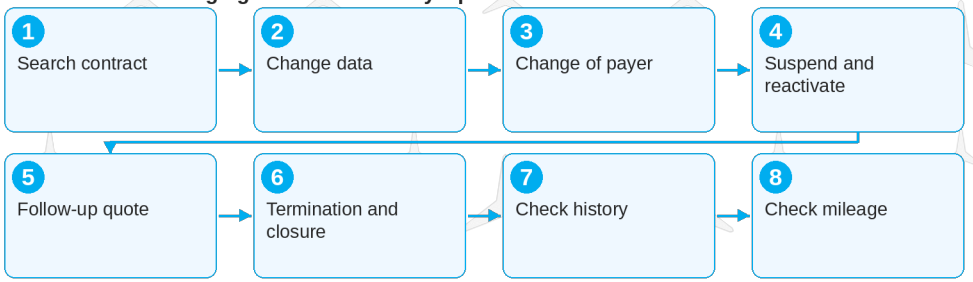

10.5 – 10.9 Ending and tracing

- Extension, follow-up quote and follow-up contract
- Termination, cancellation and closure
- Financial consequences and closing evidence
- Change history and traceability
- Mileage, mileage history and projection

oneSCM process map – position of Chapter 10

Process view: Managing Contracts in Daily Operations

How to proceed

1. Search for the contract via reference number, VIN or customer and check the **details** (10.1).
2. Change **contract, customer or payment data** via the permitted actions (10.2); the payment interval can later only be changed to "one-time".
3. Carry out a **change of payer** or **contract transfer** with the required evidence (10.3).
4. **Suspend** or **reactivate** for legitimate reasons (10.4).

> ! **Changes to product, term or mileage require a new contract.** Cancellations and closures have financial consequences (Chapter 11.6) and are irreversible.

5. Before the end of the term, create a **follow-up quote** or a **follow-up contract** (10.5).
6. For **termination, cancellation or closure**, check the **financial consequences** and secure the **closing evidence** (10.6 and 10.7).
7. Check the **change history** (10.8); every change is traceable with time, role and reason.
8. Check the **mileage history** and trigger the **mileage projection** when MIC data is missing (10.9); it is a reference value and does not end the contract.

Note: This Quick Guide summarizes Chapter 10 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Managing Contracts in Daily Operations

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: initiate changes, create follow-up quotes
- **MO**: review of changes (Chapter 9.7)
- **Finance department**: financial consequences and evidence

Prerequisites

- Contract is active (Chapter 8)
- Reason and time of the change are known
- Customer consent is available where required

Checklist before completion

- ☐ Contract uniquely identified
- ☐ Permitted change selected, evidence available
- ☐ Financial consequences checked
- ☐ Change documented in the history

Notes and pitfalls

- Changes go through the MO Check according to Chapter 9.7.
- A mileage from a workshop invoice above the contract mileage sets the status "expired by mileage" (10.6).
- The history is the basis for reporting and governance (Chapter 16).

Frequently asked questions and answers

- **Can I increase the mileage?** Not in the current contract; this requires a new contract or follow-up contract (10.2 and 10.5).
- **What is the difference between cancellation and termination?** Cancellation voids the contract, termination ends it at a set date; both have their own financial consequences (10.6 and 10.7).
- **Where can I see who changed something?** In the contract's change history (10.8).

Important links and contacts

- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- Calculation examples and finance reference – Appendix I.2.
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 10 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Invoicing, Payment, Costs and Reports

oneSCM *for Vans*

Purpose and benefit

You understand **invoicing and payment schedules**, distinguish **invoice and payment status**, handle **different invoice recipients and collective invoices**, know **cost management and claims**, **final settlement and corrections** and use **reporting and exports** (Chapter 11.1 to 11.8).

11

Chapter 11 of 23

Billing

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

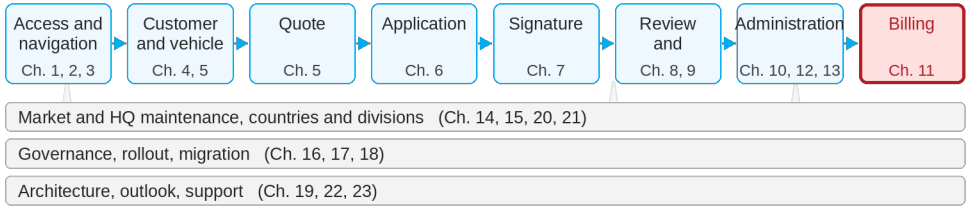

11.1 – 11.4 Invoice and costs

- Invoicing and payment schedules
- Distinguishing invoice status and payment status
- Different invoice recipients and collective invoice
- Cost management and claims

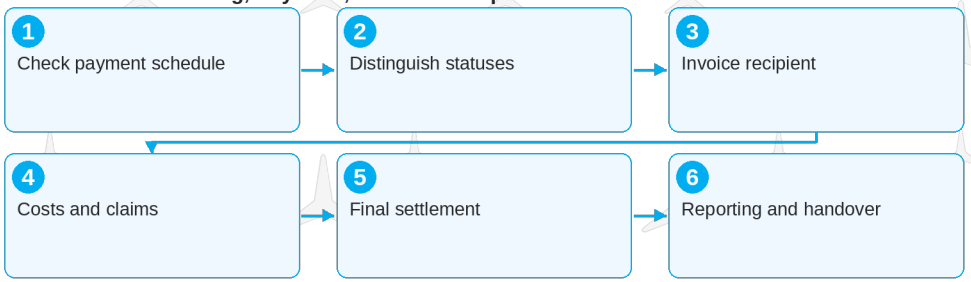

11.5 – 11.8 Settlement and reporting

- Workshop and supplier references
- Final settlement, refund and corrections
- Reporting, filters and exports
- Handing over deviations to the department or support

oneSCM process map – position of Chapter 11

Process view: Invoicing, Payment, Costs and Reports

How to proceed

1. Check the contract's **payment schedule** (11.1): interval, amounts and due dates.
2. Distinguish **invoice status** (issued, cancelled) and **payment status** (open, paid, overdue) (11.2).
3. For a **different invoice recipient** or **collective invoice**, check the assignment from Chapter 7.2 (11.3).

> ! **Invoice and payment status are separate values.** An issued invoice is not paid, and an incoming payment does not automatically change the contract status.

4. Track **costs and claims** per contract (11.4) and the **workshop and supplier references** (11.5).
5. On closure, the **final settlement** takes place with **refund** or **correction** (11.6).
6. Use **reporting, filters and exports** for analyses (11.7) and hand over **deviations** to the department or support (11.8).

Note: This Quick Guide summarizes Chapter 11 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Invoicing, Payment, Costs and Reports

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: check invoice and payment status, workshop reference
- **Finance department**: payment schedules, corrections, refunds
- **Market/HQ**: reporting and analyses

Prerequisites

- Contract is active and payment data is entered (Chapter 7)
- Access to invoice and payment information
- Knowledge of the interfaces to oneERP, NEMESIS and MPay (Chapter 19)

Checklist before completion

- ☐ Payment schedule and due dates checked
- ☐ Invoice and payment status read correctly
- ☐ Invoice recipient and collective invoice appropriate
- ☐ Deviation handed over with reference number

Notes and pitfalls

- Accounting processing takes place in NEMESIS, payments via MPay, customer data via oneERP (Chapter 19.11 to 19.15).
- When a workshop invoice is accepted, the system transfers the mileage into the contract's mileage history (10.9, 11.5).
- Calculation examples for refunds are in Appendix I.2.

Frequently asked questions and answers

- **Why is the contract "paid" but the invoice "open"?** Both statuses come from different systems and are updated at different times (11.2).
- **Who corrects an incorrect invoice?** The Finance department via the correction process; you hand over the case with the reference number (11.6 and 11.8).
- **Can I export reports?** Yes, via Reporting with filters and export (11.7), depending on your role.

Important links and contacts

- NEMESIS – Accounting processing (Chapter 19.14).
- MPay – Payment integration (Chapter 19.15).
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 11 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Business Customers, Campaigns and Special Cases

oneSCM *for Vans*

Purpose and benefit

You know the **additional requirements for business customers** and **fleets**, apply **campaigns and special conditions**, submit **special case requests** with a justification, understand **dealer assignment, validation and approval** as well as **comments** and the **Customer Account Center** (Chapter 12.1 to 12.8).

12

Chapter 12 of 23

Administration

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

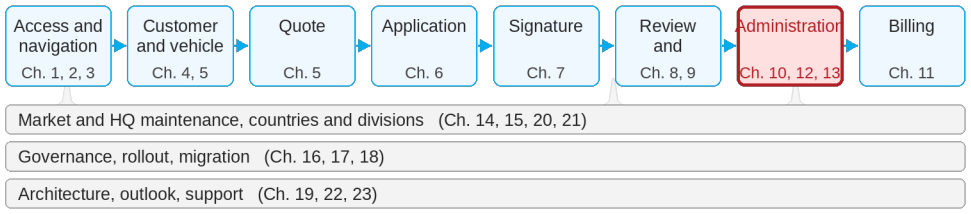

12.1 – 12.4 Business customers and special case

- Additional requirements for business customers
- Fleet and special customer constellations
- Campaigns and special conditions
- Special case request and justification

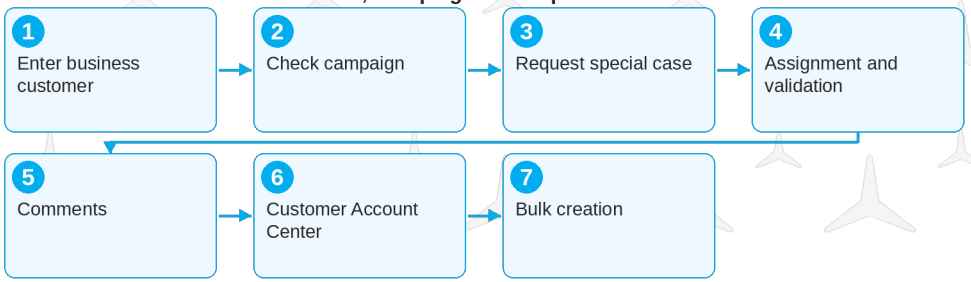

12.5 – 12.9 Processing

- Dealer assignment and further processing
- Validation, approval and rejection
- Internal and external comments
- Customer Account Center
- Bulk creation and validation of vehicle lists

oneSCM process map – position of Chapter 12

Process view: Business Customers, Campaigns and Special Cases

How to proceed

1. For **business customers**, enter the company name and **VAT ID** and, if applicable, the industry (12.1); for **fleets**, check the customer constellation (12.2).
2. Select **campaigns** or **special conditions** only if the eligibility described is met (12.3).
3. For deviations from the standard, submit a **special case request** with a comprehensible **justification** (12.4).
4. The request is assigned to the responsible **Dealer** or processor (12.5) and **validated, approved or rejected** by MO or Market (12.6).

! **The customer group "KAM-managed key accounts" is to be used only for individual price requests**, i.e. for KAM-managed customers or for FS 140+.

5. Use **internal comments** for coordination and **external comments** for feedback to the customer (12.7).
6. Manage customer accounts and special cases in the **Customer Account Center** (12.8).
7. For fleets, hand vehicle lists to **bulk creation**; the system checks product, first registration and mileage per vehicle and notifies dealer, MO and MPC about the result table (12.9).

Note: This Quick Guide summarizes Chapter 12 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Business Customers, Campaigns and Special Cases

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: special case request, campaign selection, comments
- **MO/Market**: validation, approval or rejection
- **KAM**: managed key accounts and individual price requests

Prerequisites

- Customer group "Business customer" or "KAM-managed key accounts" is selected correctly (Chapter 4.1)
- Campaign eligibility is given as described
- Justification for the special case is available

Checklist before completion

- ☐ Customer group and additional details correct
- ☐ Campaign eligibility checked
- ☐ Special case justified and submitted
- ☐ Comment visibility observed

Notes and pitfalls

- Special approvals always trigger an MO check (Chapters 6.5 and 9).
- External comments are visible to the customer; do not enter internal information.
- Campaigns are maintained by the Market (Chapter 14.13).

Frequently asked questions and answers

- **When do I need a special case request?** When conditions, customer constellation or product deviate from the standard (12.4).
- **Who decides on the special case?** MO or Market after validation; you see the result in the application and in the comments (12.6).
- **What is the Customer Account Center?** The area for managing customer accounts, relationships and special cases (12.8).

Important links and contacts

- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- Practical examples along the contract process – Appendix I.1.
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 12 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Tyre Products – Tyres

oneSCM *for Vans*

Purpose and benefit

You position **tyre products** relative to the standard process, select **product, tyre type and tyre size**, configure **term, mileage and scope of services**, check **price, options and campaigns**, carry out **application, documents and activation** and manage the contract through to **termination** (Chapter 13.1 to 13.7).

13

Chapter 13 of 23

Administration

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

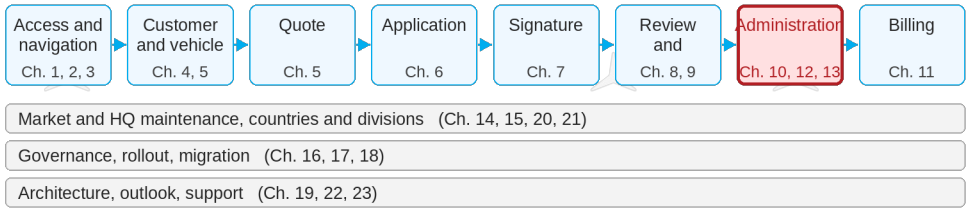

13.1 – 13.4 Product

- Positioning and distinction from the standard process
- Product, tyre type and tyre size
- Term, mileage and scope of services
- Price, options and campaigns

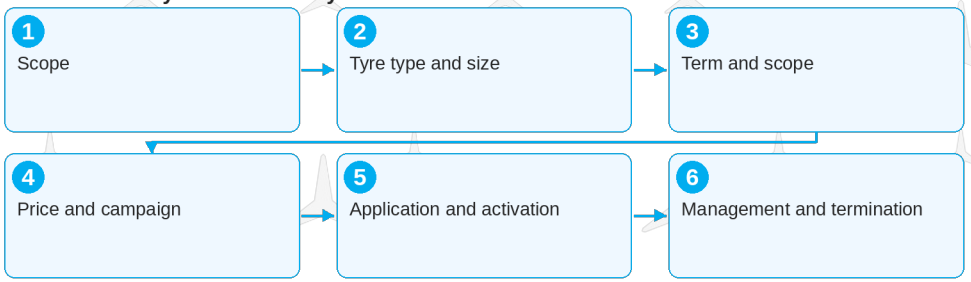

13.5 – 13.7 Contract

- Application, documents and activation
- Ongoing management and claiming services
- Renewal and termination

oneSCM process map – position of Chapter 13

Process view: Tyre Products – Tyres

How to proceed

1. Recognize the **distinction** (13.1): tyre products follow the standard process but have their own product and price parameters.
2. Select the **tyre product** as well as **tyre type** and **tyre size** matching the vehicle (13.2).
3. Configure **term, mileage and scope of services** (13.3) and check **price, options and campaigns** (13.4).

> ! **Tyre size and tyre type must match the vehicle equipment.** Deviations lead to rejection in the MO Check and prevent services from being claimed.

4. Create the **application**, obtain the signature and upload the documents (13.5, as in Chapters 6 to 8).
5. During the active contract, **services are claimed** via the workshop (13.6).
6. Before the end of the term, check **renewal** or **termination** (13.7).

Note: This Quick Guide summarizes Chapter 13 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Tyre Products – Tyres

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: offer, apply for and manage tyre contracts
- **Market**: maintain tyre products, sizes and prices
- **MO**: check and activation

Prerequisites

- Vehicle data loaded (Chapter 5)
- Tyre type and tyre size of the vehicle known
- Tyre product is released in the market

Checklist before completion

- ☐ Tyre product available in the market
- ☐ Tyre type and size correct
- ☐ Term and mileage configured
- ☐ Application activated, services can be claimed

Notes and pitfalls

- Technical options and coverage codes are maintained centrally (Chapter 15.7).
- Observe division differences Cars/Vans (Chapter 21).
- Campaigns for tyre products depend on market and time (Chapter 14.13).

Frequently asked questions and answers

- **Can I combine tyres and service in one contract?** This depends on the market's product offering (Chapters 13.1 and 14.8).
- **Where does the tyre size come from?** From the vehicle data; check it against the actual equipment (13.2).
- **How are services claimed?** Via the workshop with reference to contract and coverage (13.6 and 19.9).

Important links and contacts

- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- VEGA – Contract, coverage and claim (Chapter 19.9).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 13 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Market Role, Product and Price Maintenance and Administration

oneSCM *for Vans*

Purpose and benefit

You know the **tasks and scope of the Market role**, maintain **market-specific settings**, **templates**, **products, price versions, vehicle groups and campaigns**, use **Product Testing** and document **changes and approvals** (Chapter 14.1 to 14.14).

14

Chapter 14 of 23

Market and HQ maintenance, countries and divisions

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

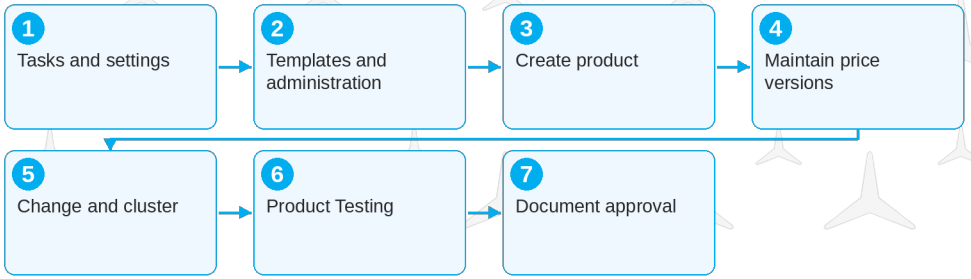

14.1 – 14.7 Market and administration

- Tasks and scope of the Market role
- Market-specific settings
- Country deviations from the Blueprint
- Template administration and template management
- Administration area and permitted actions
- Market-related visibility and authorizations
- Check, approve and document changes

14.8 – 14.14 Product, price, campaign

- Product definition, creation and publication
- Price versions, clusters and factor limits
- Product change, versioning and effect on existing contracts
- Vehicle groups and Van model series clustering
- Product Testing as a work area
- Campaign creation and discount maintenance
- Price components, Cost Unit Split and inflation

Process view: Market Role, Product and Price Maintenance and Administration

How to proceed

1. Clarify **tasks and scope** relative to the HQ role (14.1) and maintain **market-specific settings** and **country deviations** (14.2 and 14.3).
2. Manage **templates** (14.4) and use only the **permitted actions** in the administration area (14.5); check **visibility and authorizations** (14.6).
3. **Define** products, create them and **publish** them (14.8).
4. Maintain **price versions, clusters and factor limits** as well as **price components, Cost Unit Split and inflation** (14.9 and 14.14).

> ! **Published price versions take effect immediately on new quotes.** Check factor limits and the effect on existing contracts in Product Testing before you publish.

5. For **product changes**, observe **versioning** and the **effect on existing contracts** (14.10); cluster **vehicle groups** and **Van model series** (14.11).
6. Test changes in **Product Testing** (14.12) before you create **campaigns and discounts** (14.13).
7. **Check, approve and document** every change (14.7).

Note: This Quick Guide summarizes Chapter 14 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Market Role, Product and Price Maintenance and Administration

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Market**: product, price and campaign maintenance, administration
- **HQ**: Blueprint and approvals (Chapter 15)
- **MO/Dealer**: feedback from checks and sales

Prerequisites

- Market role with administration rights (Chapter 2)
- Blueprint and country deviations known (Chapters 15 and 20)
- Market's approval process clarified (Chapter 16.3)

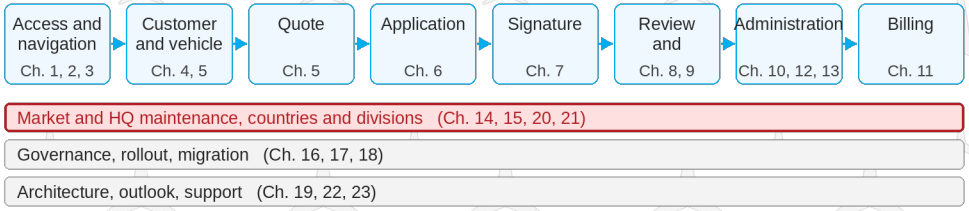

Checklist before completion

- ☐ Change checked in Product Testing
- ☐ Price version, cluster and factor limits plausible
- ☐ Effect on existing contracts assessed
- ☐ Approval documented

Notes and pitfalls

- A cluster for the relative base price requires a price factor (14.9).
- Vehicle groups: the product with a current price version is preselected, expired price versions are not shown; on request the system generates name and description from the filters (14.11).
- When a campaign is duplicated, the system resets the External Campaign ID; deactivated campaigns remain editable (14.13).
- Depending on versioning, product changes affect only new contracts or existing contracts as well (14.10).

oneSCM process map – position of Chapter 14

Frequently asked questions and answers

- **What may the Market change without HQ?** Market-specific settings, prices, campaigns and templates within the Blueprint; deviations require HQ approval (14.3 and 15.4).
- **How do I test a new product?** In Product Testing with test data from Appendix I.3, before it is published (14.12).
- **What is a Cost Unit Split?** The split of the price into cost components, e.g. for inflation adjustments (14.14).

Important links and contacts

- Transition module T14-15 – Connecting market maintenance and central requirements.
- Test data catalog – Appendix I.3.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 14 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – HQ Role, Blueprint and Central Master Data

oneSCM *for Vans*

Purpose and benefit

You know the **tasks and scope of the HQ role**, maintain the **Blueprint** and **global standards**, handle **country deviations**, steer **governance and approvals**, work together with **Market and MO** and are responsible for **Technical Options, SA matching and coverage codes** (Chapter 15.1 to 15.7).

15

Chapter 15 of 23

Market and HQ maintenance, countries and divisions

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

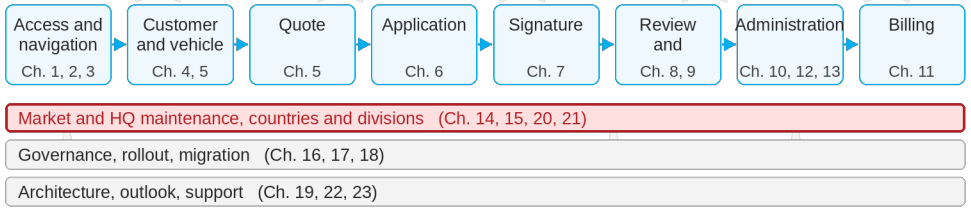

15.1 – 15.4 Blueprint and governance

- Tasks and scope of the HQ role
- Blueprint maintenance and global standards
- Handling country deviations
- Governance and approvals at HQ level

15.5 – 15.7 Collaboration and master data

- Collaboration with Market and MO
- Task description versus documented navigation
- Technical options, SA matching, coverage and industry codes

oneSCM process map – position of Chapter 15

Process view: HQ Role, Blueprint and Central Master Data

How to proceed

1. Distinguish the **HQ role** from Market and MO (15.1).
2. Maintain the **Blueprint** and the **global standards** as the binding basis for all markets (15.2).
3. Assess **country deviations** and approve or reject them (15.3); record the result in the register (Chapter 20.6).

> ! **Changes to coverage codes and SA matching affect all markets and divisions.** They are published only after approval and with test evidence (Chapter 16.4).

4. Steer **governance and approvals** at HQ level (15.4) following the approval workflow from Chapter 16.3.
5. Align with **Market and MO** (15.5); distinguish between **task description** and **documented navigation** in the system (15.6).
6. Maintain **technical options, SA matching, coverage and industry codes** centrally (15.7); they control product assignment and claiming of services. Markets appear in the language of the market settings.

Note: This Quick Guide summarizes Chapter 15 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – HQ Role, Blueprint and Central Master Data

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **HQ**: Blueprint, global standards, central master data
- **Market**: local configuration and feedback (Chapter 14)
- **MO**: check rules and quality feedback (Chapter 9)

Prerequisites

- HQ role with central maintenance rights
- Governance process and approval levels known (Chapter 16)
- Country deviation register accessible (Chapter 20.6)

Checklist before completion

- ☐ Blueprint change justified and approved
- ☐ Country deviation assessed and in the register
- ☐ Technical Options and coverage codes tested
- ☐ Market and MO informed

Notes and pitfalls

- The Blueprint is the reference for training and handbook; deviations are documented per country (Chapter 20).
- Group names of technical options are unique per division; the Blueprint wizard ends with the step "Overview & Confirmation" (15.2, 15.7).
- Transition modules T15-14 and T15-16 connect HQ maintenance with Market and governance.

Frequently asked questions and answers

- **What is the Blueprint?** The global standard process with products, rules and master data from which markets may deviate only in a documented way (15.2).
- **Who maintains coverage codes?** HQ centrally; markets use them in product definition and claiming of services (15.7).
- **How do HQ and Market proceed in case of conflicts?** Via the clarification register and the governance approval (15.4 and 16.7).

Important links and contacts

- Transition module T15-14 – Handing over central foundations to market maintenance.
- Transition module T15-16 – From the maintenance decision to governance evidence.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 15 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Governance, Quality, Data Protection and Archiving

oneSCM *for Vans*

Purpose and benefit

You observe **data protection** and safe sample data, ensure **data quality and data ownership**, use the **approval workflow**, document **test evidence**, distinguish **document management and archiving**, maintain **sources, tickets and versions** as well as the **clarification register** (Chapter 16.1 to 16.8).

16

Chapter 16 of 23

Governance, rollout, migration

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

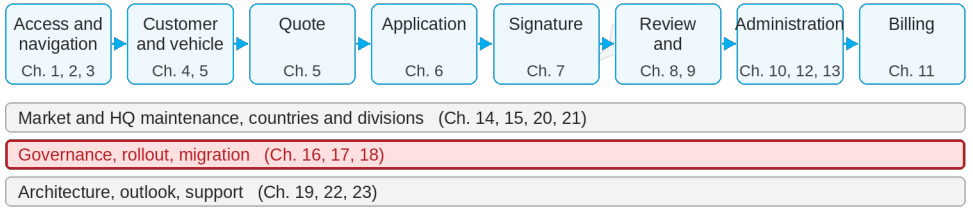

16.1 – 16.4 Data protection and quality

- Data protection and safe sample data
- Data quality and data ownership
- Functional review and approval workflow
- Test evidence and productive functional baseline

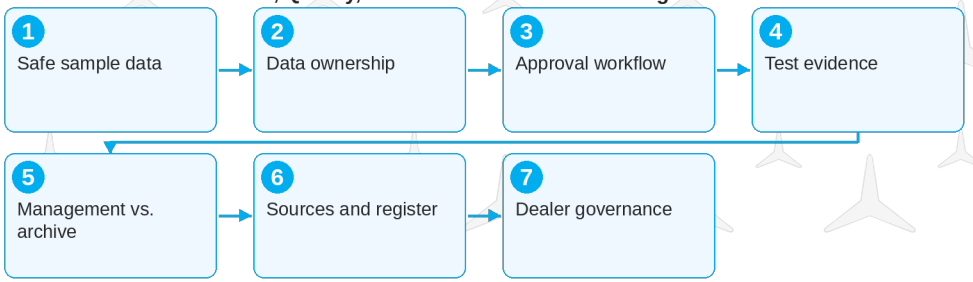

16.5 – 16.8 Evidence

- Distinguishing document management and archiving
- Sources, ticket references and version control
- Contradictions, gaps and clarification register
- Dealer governance and reporting evidence

oneSCM process map – position of Chapter 16

Process view: Governance, Quality, Data Protection and Archiving

How to proceed

1. Use only **safe sample data** in training, tickets and screenshots; no real customer or bank details (16.1).
2. Observe **data ownership** (16.2): the leading system (e.g. oneERP for customers) is authoritative; corrections are made there.
3. Go through the **approval workflow** (16.3): functional review, approval, documentation.
4. Store **test evidence** and record the **productive functional baseline** (16.4).

! **Personal data never belongs in comments, tickets or screenshots.** Use the test data catalog (Appendix I.3) and anonymize examples.

5. Distinguish **document management** (ongoing process) from **archiving** (legally secure filing) (16.5).
6. Maintain **sources, ticket references and versions** (16.6) and enter **contradictions and gaps** in the **clarification register** (16.7).
7. Ensure **dealer governance** and **reporting evidence** (16.8).

Note: This Quick Guide summarizes Chapter 16 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Governance, Quality, Data Protection and Archiving

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: data protection and data quality
- **Market/HQ**: approval workflow, version control, governance
- **Dealer**: dealer governance and reporting evidence

Prerequisites

- Knowledge of the group's data protection rules
- Access to clarification register and ticket references
- Market's approval levels known

Checklist before completion

- ☐ Examples anonymized
- ☐ Leading system observed
- ☐ Approval documented
- ☐ Clarification register updated

Notes and pitfalls

- Archived documents are immutable; corrections create new versions.
- Automated end-to-end tests for vehicle and product management are part of the test evidence per release (16.4).
- The clarification register is required reading before releases (Chapter 22).

Frequently asked questions and answers

- **May I send a screenshot with customer data to Support?** Only anonymized or with test data; real data must be redacted (16.1).
- **What is the difference between document management and archiving?** Document management accompanies the process; archiving is the legally secure, immutable filing (16.5).
- **Where do I report a contradiction in the handbook?** In the clarification register with chapter, source and ticket reference (16.7 and Appendix F).

Important links and contacts

- Sources and clarification register – Appendix F.
- Test data catalog and evidence – Appendix I.3.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 16 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Rollout and Go-Live

oneSCM *for Vans*

Purpose and benefit

You know the **target markets and go-live scope**, the **prerequisites for access, configuration and training**, the **market preparation with functional acceptance**, the **training and handover to operations** as well as the **support after go-live** (Chapter 17.1 to 17.5).

17

Chapter 17 of 23

Governance, rollout, migration

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

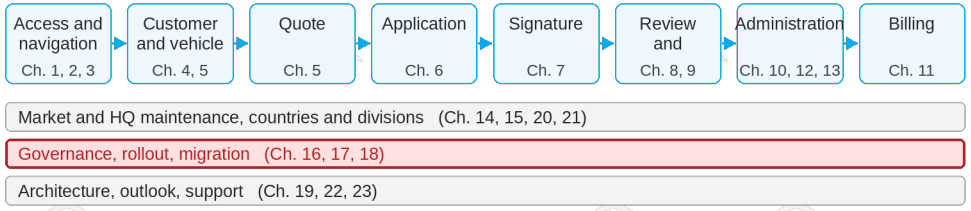

17.1 – 17.3 Preparation

- Target markets and go-live scope
- Prerequisites for access, configuration and training
- Market preparation and functional acceptance

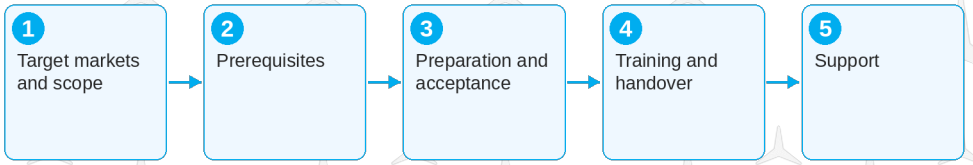

17.4 – 17.5 Operations

- Training and handover to operations
- Support after go-live and open items

oneSCM process map – position of Chapter 17

Process view: Rollout and Go-Live

How to proceed

1. Clarify **target markets and go-live scope** (17.1): which divisions, products and roles go live when?
2. Ensure the **prerequisites** (17.2): access, market configuration, training environment.
3. Carry out the **market preparation** and document the **functional acceptance** with test evidence (17.3, Chapter 16.4).

> **!** **Without documented functional acceptance there is no productive start in the market.** Acceptance, test evidence and training status are prerequisites for the handover to operations.

4. Train the roles with the handbook, Quick Guides and knowledge checks (Appendix H) and hand over to **operations** (17.4).
5. Support the go-live (**hypercare**) and track **open items** in the clarification register (17.5).

Note: This Quick Guide summarizes Chapter 17 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Rollout and Go-Live

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Project/HQ**: rollout planning and acceptance
- **Market**: market preparation, configuration, training
- **Dealer/MO**: participation in training and acceptance

Prerequisites

- Rollout plan with target markets is available
- Authorizations for training and production system requested (Chapter 2)
- Market configuration completed according to Chapter 14

Checklist before completion

- ☐ Target markets and scope confirmed
- ☐ Access and configuration ready
- ☐ Acceptance documented
- ☐ Training carried out, open items recorded

Notes and pitfalls

- Country-specific go-live and migration are covered in Chapters 20.5 and 18.
- Everyday checklists for getting started can be found in Appendix B.
- Release information on the functional baseline in Chapter 22.4.

Frequently asked questions and answers

- **Who accepts the market?** The Market functionally, HQ for Blueprint conformity; both are documented (17.3).
- **Which training materials are available?** Handbook, Quick Guides per chapter, knowledge checks (Appendix H) and training material in the RetailPortal.
- **How long does the support after go-live last?** According to the market's rollout plan; open items are tracked in the register until closed (17.5).

Important links and contacts

- oneSCM RetailPortal – System news and training material.
- Knowledge checks and solutions – Appendix H.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 17 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Migration and Transfer of Existing Data

oneSCM *for Vans*

Purpose and benefit

You know the **scope and boundaries of the migration**, the **source systems and data objects**, the **data mapping and quality check**, check **transferred customers and contracts**, handle **error cases** and understand **cutover and parallel operation** (Chapter 18.1 to 18.6).

18

Chapter 18 of 23

Governance, rollout, migration

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

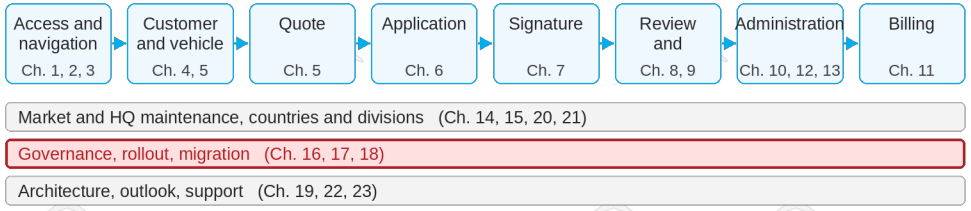

18.1 – 18.3 Preparation

- Scope and boundaries of the migration
- Source systems and data objects
- Data mapping and quality check

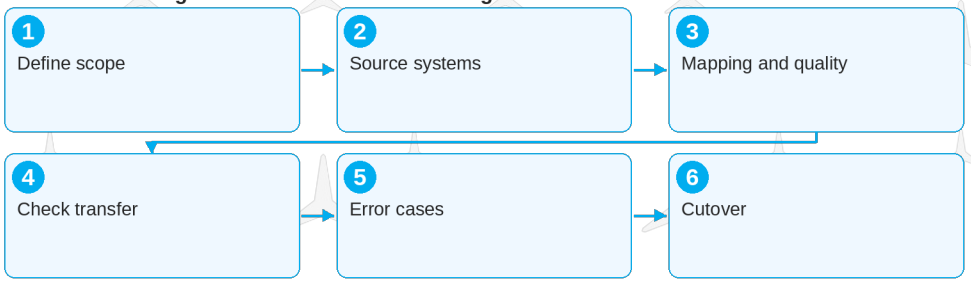

18.4 – 18.6 Execution

- Checking transferred customers and contracts
- Error cases, correction paths and evidence
- Cutover and parallel operation

oneSCM process map – position of Chapter 18

Process view: Migration and Transfer of Existing Data

How to proceed

1. Clarify **scope and boundaries** (18.1): which contracts, customers and documents are transferred, which remain in the legacy system?
2. Identify **source systems and data objects** (18.2), e.g. legacy systems from Chapter 19.20.
3. Check **data mapping** and **quality** using the check rules (18.3).

> ! **During parallel operation, migrated contracts may be changed only in the leading system.** Duplicate maintenance creates contradictions and blocks activation.

4. Check **transferred customers and contracts** on a sample basis and according to the error list (18.4).
5. Handle **error cases** via the defined **correction paths** and secure **evidence** (18.5).
6. Observe **cutover and parallel operation** (18.6): from the cutover date, oneSCM is the leading system.

Note: This Quick Guide summarizes Chapter 18 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Migration and Transfer of Existing Data

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Project/HQ**: migration scope, cutover
- **Market**: data mapping and quality check
- **Dealer/MO**: checking transferred customers and contracts

Prerequisites

- Migration plan and source systems are known
- Access to check and error lists
- Correction paths and contact persons are defined

Checklist before completion

- ☐ Migration scope confirmed
- ☐ Mapping and quality checked
- ☐ Samples checked
- ☐ Error cases corrected with evidence

Notes and pitfalls

- Migrated contracts are marked as migrated in the history (Chapter 10.8).
- Data ownership according to Chapter 16.2 also applies to legacy data.
- Country-specific migration in Chapter 20.5.

Frequently asked questions and answers

- **Are all legacy contracts migrated?** Only those defined in the migration scope; the rest run out in the legacy system (18.1).
- **What do I do with an incorrectly migrated contract?** Report the error case via the correction path; do not rebuild it manually (18.5).
- **When does parallel operation end?** On the cutover date defined in the cutover plan (18.6).

Important links and contacts

- Legacy systems and transition architecture – Chapter 19.20.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 18 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – IT Architecture

oneSCM *for Vans*

Purpose and benefit

You know the **system map** and the connected systems for **order, vehicle, contract, finance, payment and authorization data**, the **integration paths**, the **interface operation with error handling** as well as the **individual system profiles** (Chapter 19.1 to 19.31).

19

Chapter 19 of 23

Architecture, outlook, support

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

Order and vehicle (19.2 – 19.10)

- GO – Cars order information
- AFAB – Vans order information
- CEPRO – Vans vehicle master data
- OTR – Order and vehicle reference
- DSB – Mileage reading
- Warranty-and-Goodwill-API, MIC
- VEGA – Contract, coverage, claim
- BS4 or SDB4

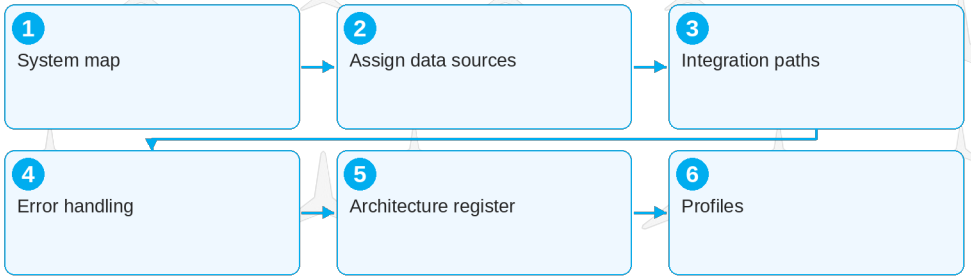

Finance, payment, authorization (19.11 – 19.17)

- oneERP – Customer and finance integration
- CoFiCo and SWT – FI connection
- NEMESIS – Accounting
- MPay – Payment
- ALICE – Authorizations
- DATIX – Manual handover

Operation and profiles (19.18 – 19.31)

- Other systems, data platforms, legacy
- Integration paths and interface operation
- Architecture register
- Profiles: VeDoc, VERSO/VOM, oneDoC, Xentry, MBFS Bundling, POS channels, insurers, suppliers

Process view: IT Architecture

How to proceed

1. Start with the **architecture overview and system map** (19.1).
2. Assign the data sources per process step:
   - Vehicle and order: GO, AFAB, CEPRO, OTR, MIC, DSB (19.2 to 19.8)
   - Contract and services: VEGA, BS4/SDB4, Warranty-and-Goodwill-API (19.7, 19.9, 19.10)
   - Customer and finance: oneERP, CoFiCo, SWT, NEMESIS, MPay (19.11 to 19.15)
   - Access: ALICE (19.16); manual handover: DATIX (19.17)
3. Know the **technical integration paths** (19.21) and the **interface operation** with **error handling** (19.22).

> ! **Do not work around interface errors with manual duplicate maintenance.** Report the error with reference number and system to Support; DATIX is only the documented manual handover path.

4. Use the **architecture register** for open evidence (19.23).
5. Look up the **individual system profiles** as needed (19.24 to 19.31).

Note: This Quick Guide summarizes Chapter 19 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – IT Architecture

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **HQ/IT**: architecture, interface operation
- **Market/MO**: error handling and evidence
- **Dealer**: understanding of data origin

Prerequisites

- Basic understanding of the contract process (Chapter 3)
- Access to the architecture register (19.23)
- Support path for interface errors known (Chapter 23)

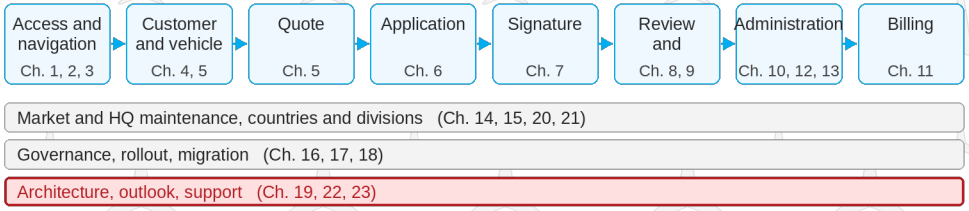

Checklist before completion

- ☐ System map understood
- ☐ Data source per process step known
- ☐ Error path for interface failures known
- ☐ Profile of the affected system read

Notes and pitfalls

- Cars and Vans use different order systems (GO or AFAB/CEPRO).
- Van master data arrives via the CeproImport batch job; report batch job incidents with job name and time (19.4, 19.22).
- Legacy systems (19.20) run only until the cutover (Chapter 18.6).

oneSCM process map – position of Chapter 19

Frequently asked questions and answers

- **Where does the vehicle data in the application come from?** Depending on the entry point, from OTR, VERSO/VOM or MIC; Vans master data from CEPRO (19.4 to 19.8).
- **What does VEGA do?** VEGA maintains contract, coverage and claim for claiming services (19.9).
- **When is DATIX used?** Only for the documented manual handover when no automated path exists (19.17).

Important links and contacts

- Architecture register and open evidence – Chapter 19.23.
- Interface operation and error handling – Chapter 19.22.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 19 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Country-Specific Topics

oneSCM *for Vans*

Purpose and benefit

You read the **country and market profile**, know **local roles and access variants**, **local products, prices and campaigns**, **payment, documents and signature per country**, the **country-specific go-live and migration** as well as the **country deviation register** (Chapter 20.1 to 20.6).

20

Chapter 20 of 23

Market and HQ maintenance, countries and divisions

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

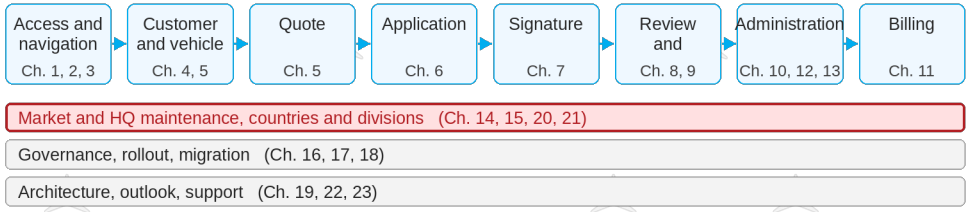

20.1 – 20.3 Profile and products

- Country and market profile
- Local roles and access variants
- Local products, prices and campaigns

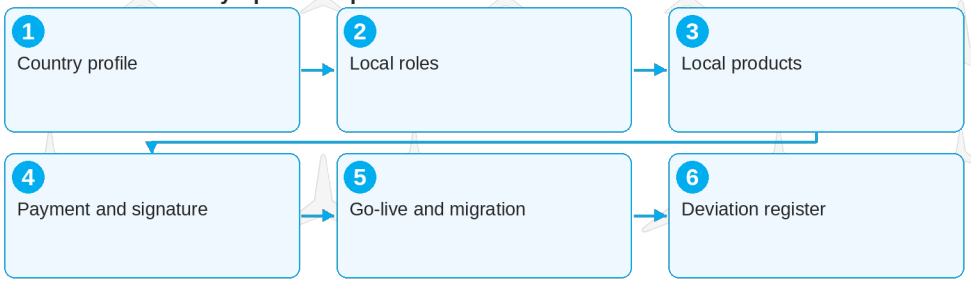

20.4 – 20.6 Processing and quality

- Payment, documents and signature per country
- Country-specific go-live and migration
- Country deviation register and quality

oneSCM process map – position of Chapter 20

Process view: Country-Specific Topics

How to proceed

1. Read the **country and market profile** of your country (20.1).
2. Check **local roles and access variants** (20.2) against Chapter 2.
3. Observe **local products, prices and campaigns** (20.3) and their maintenance by the Market (Chapter 14).

> ! **Undocumented country deviations are not permitted.** In case of doubt, the Blueprint applies; deviations are added to the register via Market and HQ.

4. Apply the country-specific rules for **payment, documents and signature** (20.4), e.g. language variants and permitted signature types.
5. Follow the **go-live and migration** of your country (20.5, Chapters 17 and 18).
6. Check every deviation in the **country deviation register** (20.6); only documented deviations apply.

Note: This Quick Guide summarizes Chapter 20 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Country-Specific Topics

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Market**: maintain country profile and deviation register
- **HQ**: approve deviations (Chapter 15.3)
- **Dealer/MO**: apply local rules

Prerequisites

- Own country and market are known (Chapter 2.4)
- Access to the country deviation register
- Knowledge of the Blueprint (Chapter 15.2)

Checklist before completion

- ☐ Country profile read
- ☐ Local roles and access checked
- ☐ Local product and payment rules known
- ☐ Deviations checked in the register

Notes and pitfalls

- For each deviation, the register contains reason, approval and validity.
- Signature types and document languages may differ per country (Chapters 7.4 to 7.6).
- Known errors with market reference are listed in Chapter 23.2.

Frequently asked questions and answers

- **Does my Quick Guide apply in every country?** The standard process does; country-specific deviations are in the country profile and register (20.1 and 20.6).
- **Who enters deviations?** The Market requests, HQ approves (15.3 and 20.6).
- **Which signature types exist in my country?** See Chapter 20.4 and the country profile.

Important links and contacts

- Country deviation register – Chapter 20.6.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 20 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Division-Specific Topics

oneSCM *for Vans*

Purpose and benefit

You know the **division profile** and the **distinction Cars/Vans**, the **vehicle data and identifiers per division**, **products and price parameters per division**, **application, signature and activation per division**, **management and financial consequences** as well as **division planning, tests and approvals** (Chapter 21.1 to 21.6).

21

Chapter 21 of 23

Market and HQ maintenance, countries and divisions

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

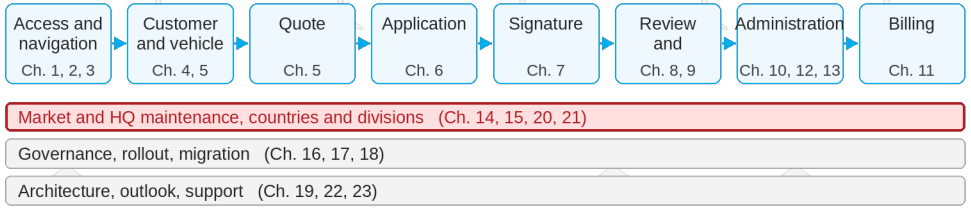

21.1 – 21.3 Profile and data

- Division profile and distinction Cars/Vans
- Vehicle data and identifiers per division
- Products and price parameters per division

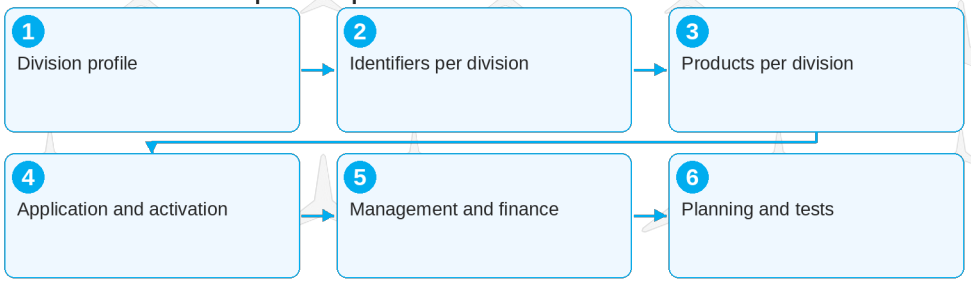

21.4 – 21.6 Process and planning

- Application, signature and activation per division
- Management and financial consequences per division
- Division planning, tests and approvals

oneSCM process map – position of Chapter 21

Process view: Division-Specific Topics

How to proceed

1. Read the **division profile** and the **distinction Cars/Vans** (21.1).
2. Use the **identifiers per division** (21.2):
   - Cars: order data from GO (Chapter 19.2)
   - Vans: order data from AFAB, master data from CEPRO, model series clustering (Chapters 19.3, 19.4, 14.11)
3. Select the division's **products and price parameters** (21.3).

! **Cars and Vans contracts use different order systems and identifiers.** A wrong division context leads to wrong products and prices; check the context before the quote.

4. Carry out **application, signature and activation** according to the division rules (21.4).
5. Observe **management and financial consequences** per division (21.5).
6. **Division planning, tests and approvals** are the responsibility of Market and HQ (21.6).

Note: This Quick Guide summarizes Chapter 21 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Division-Specific Topics

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: entry in the correct division
- **Market**: products and prices per division (Chapter 14.11)
- **HQ**: division planning and approvals

Prerequisites

- Role for the respective division enabled (e.g. oneSCM.DealerVAN)
- Division context is set (Chapter 2.4)
- Vehicle identifiers of the division known

Checklist before completion

- ☐ Division context correct
- ☐ Identifier of the division used
- ☐ Product of the division selected
- ☐ Division rules for signature and activation observed

Notes and pitfalls

- The template for this Quick Guide is the Vans example "Application creation and management".
- The BM6 flow for Vans offers all sales designations matching model series and engine type; model series with seven and eight digits are accepted (21.2).
- Cross-division special cases in Chapter 12.

Frequently asked questions and answers

- **Can I create Cars contracts with the Vans role?** No, this requires the Cars role and the matching context (Chapter 2.2).
- **Why do the entry points differ?** Because Cars and Vans have different order and master data systems (21.2 and 19).
- **Where are the division tests?** In Chapter 21.6 and in the test data catalog (Appendix I.3).

Important links and contacts

- Division profile Cars/Vans – Chapter 21.1.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 21 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Outlook and Further Development

oneSCM *for Vans*

Purpose and benefit

You know the **confirmed functional baseline**, the **planned enhancements and open requirements**, the **impact on training and handbook** as well as the **release information and change overview** (Chapter 22.1 to 22.4).

22

Chapter 22 of 23

Architecture, outlook, support

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

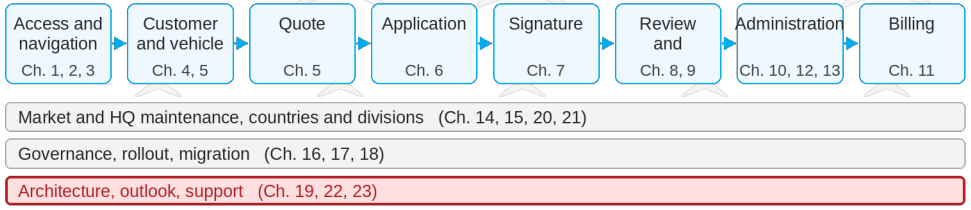

22.1 – 22.2 Baseline and planning

- Confirmed functional baseline
- Planned enhancements and open requirements

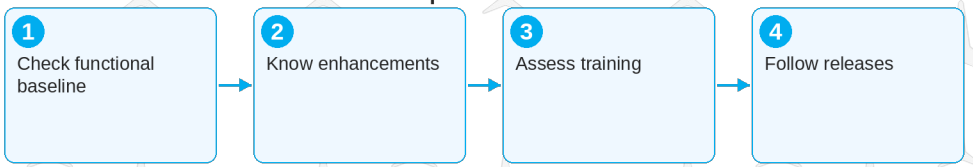

22.3 – 22.4 Impact and release

- Impact on training and handbook
- Release information and change overview

oneSCM process map – position of Chapter 22

Process view: Outlook and Further Development

How to proceed

1. Check the **confirmed functional baseline** (22.1): only documented and tested functions count as productive (Chapter 16.4).
2. Read **planned enhancements and open requirements** (22.2); they are not part of the current process.

> ! **Planned functions must not be trained or promised to customers** before they are confirmed as the productive functional baseline.

3. Assess the **impact on training and handbook** (22.3) and plan updates to the Quick Guides.
4. Follow the **release information and change overview** (22.4) and align the version in the footer of the guides.

Note: This Quick Guide summarizes Chapter 22 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Outlook and Further Development

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **HQ/Project**: release planning and change overview
- **Market**: assessment of the impact on training
- **All roles**: knowledge of the valid functional baseline

Prerequisites

- Current handbook version and release status known
- Access to release information
- Clarification register for open requirements (Appendix F)

Checklist before completion

- ☐ Functional baseline checked
- ☐ Open requirements known
- ☐ Training needs assessed
- ☐ Release changes read

Notes and pitfalls

- Every change has a ticket reference (Chapter 16.6).
- The system does not convert kilometers to miles, performs no ISP code check and adds the chassis number for deal or order IDs only via the system handover (22.2).
- The version of each Quick Guide is shown in the footer.

Frequently asked questions and answers

- **How do I know whether a function is productive?** From the confirmed functional baseline (22.1) and the test evidence (16.4).
- **How often are the Quick Guides updated?** With every release that changes process steps (22.3 and 22.4).
- **Where do I report a new requirement?** Via the clarification register and the Market to HQ (22.2 and 16.7).

Important links and contacts

- Release information and change overview – Chapter 22.4.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 22 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – FAQ, Troubleshooting and Support

oneSCM *for Vans*

Purpose and benefit

You find **frequent questions per process phase** and **known errors by market and release**, distinguish **usage question, data deviation and incident**, compile the **information for a support case**, and know the **support and escalation paths** and **confirmed workarounds** (Chapters 23.1 to 23.6).

23

Chapter 23 of 23

Architecture, outlook, support

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

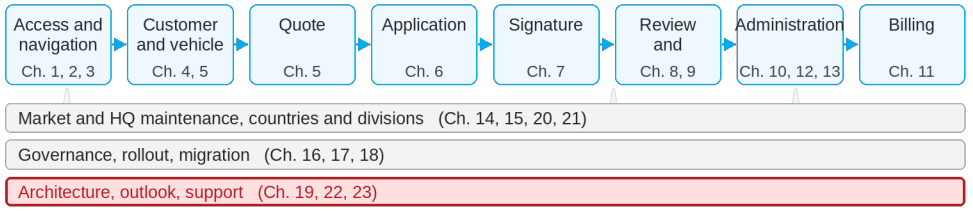

23.1 – 23.3 Classify

- Frequently asked questions by process phase
- Known errors by market and release
- Usage question, data deviation and incident

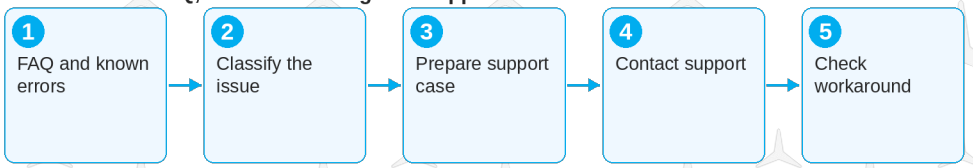

23.4 – 23.6 Report and resolve

- Information for a support case
- Support and escalation paths
- Confirmed workarounds and result check

oneSCM process map – position of Chapter 23

Process view: FAQ, Troubleshooting and Support

How to proceed

1. First search the **FAQ per process phase** (23.1) and the **known errors** for your market and release (23.2).
2. Classify your issue (23.3):
   - **Usage question**: handbook and Quick Guide
   - **Data deviation**: leading system and business department (Chapter 16.2)
   - **Incident**: support case
3. Compile the **information for the support case** (23.4):
   - Reference number, VIN, market, division, role
   - Time, step, error message, screenshot

> ! **Unconfirmed workarounds can damage contracts and data.** Use only the solutions documented in Chapter 23.6.

4. Use the **support and escalation paths** (23.5): Vans service contract help via **sc-van@mercedes-benz.com**; further paths per market.
5. Apply only **confirmed workarounds** and check the **result** (23.6).

Note: This Quick Guide summarizes Chapter 23 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – FAQ, Troubleshooting and Support

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: self-help via FAQ and workarounds
- **Dealer/MO**: support case with complete details
- **Support/Customer Management**: processing and escalation

Prerequisites

- Reference number, market, division and role known
- Screenshot without personal data (Chapter 16.1)
- Handbook chapter for the process step checked

Checklist before completion

- ☐ FAQ and known errors checked
- ☐ Issue classified
- ☐ Support information complete
- ☐ Workaround confirmed, result checked

Notes and pitfalls

- If information is incorrect, Customer Management will contact you; incorrect applications are rejected.
- During contract creation for MBIL, the product query can end with a server error; repeat the query and report the case (23.2).
- Training material, videos and FAQ are available in the RetailPortal.

Frequently asked questions and answers

- **How long after first registration can a service contract be concluded?** Up to 12 months and/or a maximum of 50,000 km, provided the vehicle has not yet had a service (exception: company and demonstration vehicles with a previous owner).
- **Can a service package be concluded for demonstration vehicles?** Demonstration and company vehicles count as used vehicles; only a pure maintenance package is possible for them.
- **Can a person other than the registered keeper conclude the contract?** No, contract holder and registered keeper must be identical.

Important links and contacts

- **Vans service contract help**: sc-van@mercedes-benz.com
- oneSCM RetailPortal – System news and training material.
- Ticket-to-chapter mapping – Appendix E.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).

Note: This Quick Guide summarizes Chapter 23 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T6-7: From Saved Application to Payment Data and Signature

oneSCM *for Vans*

Purpose and benefit

This module links **Chapter 6** (application saved, reference number available) with **Chapter 7** (payment data, documents, signature). You check what must be in place at the **transition** and avoid the typical breaks between application and signature.

T6-7

Transition module

Chapter 6 to 7

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Transition at a glance

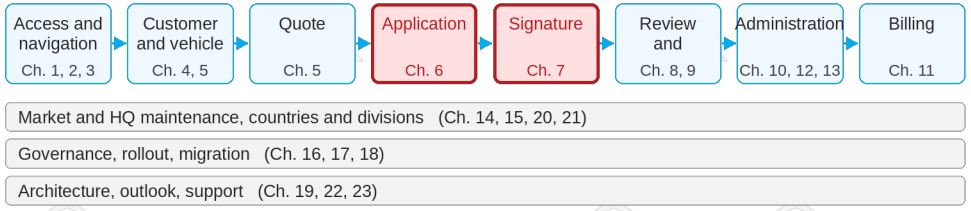

Starting point (Chapter 6)

- Application saved, status "entered"
- Customer, vehicle, product assigned
- Special approval identified or not required

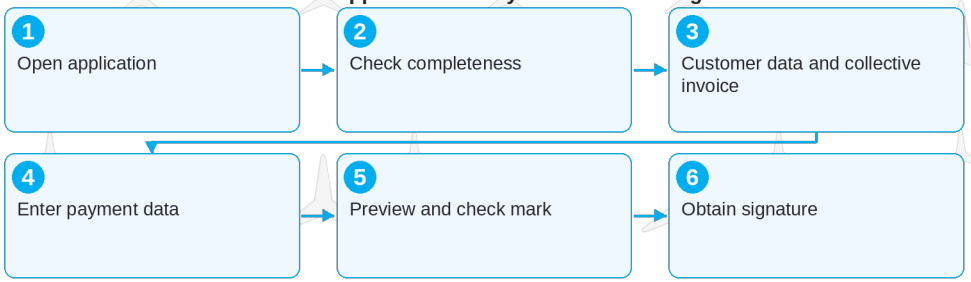

Target (Chapter 7)

- Payment method, interval, payer and invoice recipient entered
- SEPA mandate and documents generated
- Signature obtained, status checked

oneSCM process map – position of Transition module T6-7

Process view: T6-7: From Saved Application to Payment Data and Signature

How to proceed

1. Open the saved application via the **reference number** (Chapter 8.1) and check the **application status**.
2. Make sure the application is **complete**: an application with open validation cannot proceed to signature.
3. Switch to the **customer data check** and activate the **collective invoice** if required (Chapters 6 and 7.2).

! **After "Create application", product, term and mileage can no longer be changed.** Errors from Chapter 6 cannot be corrected in the transition; they require a new contract.

4. Enter **payment method, interval and bank details** (Chapters 7.1 to 7.3).
5. Generate the **application preview** and click the **check mark** to sign (Chapter 7.4).
6. Select the **signature type** and check the **signature status** (Chapters 7.5 to 7.8).

Note: This Quick Guide summarizes transition module T6-7 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T6-7: From Saved Application to Payment Data and Signature

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: carry out the transition
- **Customer**: provide payment data and sign
- **MO**: reads signature status during review

Prerequisites

- Application saved, reference number noted (Chapter 6.7)
- No red validation messages
- Customer e-mail and mobile number in customer master data

Checklist before completion

- ☐ Application status checked
- ☐ Validation without red messages
- ☐ Payment data entered
- ☐ Signature route selected and status checked

Notes and pitfalls

- The payment interval can later only be changed to "one-time".
- With special approvals, activation waits for the MO Check; the signature can still be obtained.
- Missing customer contact data block e-mail and SMS signature.

Frequently asked questions and answers

- **Can I pause between saving and signature?** Yes, the application remains accessible under its reference number in Application Management.
- **What if the customer wants to change the payment method?** Change it before signature in Chapter 7.1; after signature, a new signature is required (Chapter 7.7).
- **Does the payer have to sign?** The payer signs the SEPA mandate; the contract holder signs the contract (Chapter 7.2).

Important links and contacts

- Chapter 6 – Create service contract and complete application.
- Chapter 7 – Payment data, documents and signature.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes transition module T6-7 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T7-8: From Documents and Signature to Activation Check

oneSCM *for Vans*

Purpose and benefit

This module links **Chapter 7** (signature and documents available) with **Chapter 8** (track and activate application). You make sure that all **activation prerequisites** are met before Customer Management reviews.

T7-8

Transition module

Chapter 7 to 8

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Transition at a glance

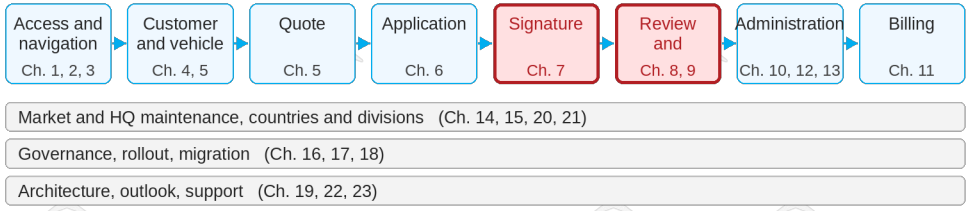

Starting point (Chapter 7)

- Signature obtained digitally or manually
- Documents filed in the system or uploaded
- Payment data complete

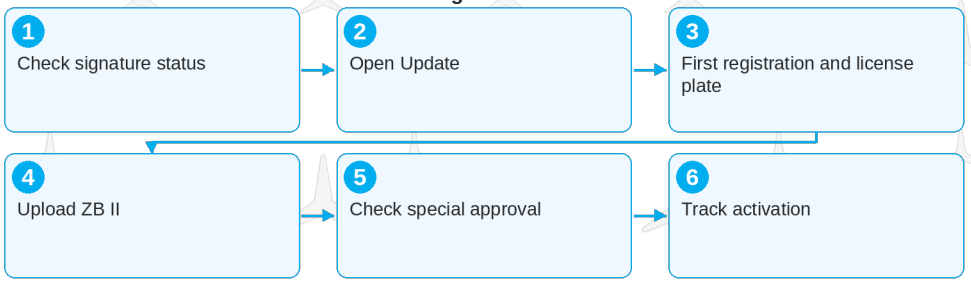

Target (Chapter 8)

- First registration and license plate added
- ZB II uploaded
- Application fully submitted, activation done

oneSCM process map – position of Transition module T7-8

Process view: T7-8: From Documents and Signature to Activation Check

How to proceed

1. Check the **signature and document status** in **Application Management** (Chapters 7.8 and 8.1).
2. Open the "**Update**" action via "**…**" and add the **first registration date** and **license plate** (Chapter 8.3).
3. In the "**Communication**" tab, upload the copy of **ZB I/ZB II** and, for the print variant, the signed document.

! **Without first registration, license plate and ZB II, no activation takes place**, even if the application is signed. The upload is not a mandatory field in the system.

4. Make sure that no **open special approval** is blocking activation (Chapters 6.5 and 9).
5. Track the **application status** until activation and respond to queries from Customer Management (Chapters 8.6 and 8.7).

Note: This Quick Guide summarizes transition module T7-8 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T7-8: From Documents and Signature to Activation Check

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: complete data and documents
- **Customer Management/MO**: review and activation
- **System**: automatic activation when complete

Prerequisites

- Signature status "signed" (Chapter 7.8)
- Contract document and SEPA mandate filed
- First registration, license plate and ZB II available

Checklist before completion

- ☐ Signature and document status checked
- ☐ First registration and license plate added
- ☐ ZB II uploaded
- ☐ No open special approval

Notes and pitfalls

- With e-signature and e-mail signature, the contract documents are filed automatically; with print, they must be uploaded.
- Incorrect applications are rejected; the customer is informed.
- The limit of 12 months or 50,000 km after first registration applies (Chapter 23.1).

Frequently asked questions and answers

- **The customer has signed, but the application is not active. Why?** Usually first registration, license plate or ZB II is missing; see Chapter 8.3.
- **Can I submit the ZB II later?** Yes, at any time via Application Management › Reference number › Communication.
- **Who activates the contract?** The system if data are complete, otherwise Customer Management after review (Chapter 8.5).

Important links and contacts

- Chapter 7 – Payment data, documents and signature.
- Chapter 8 – Track and activate application.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes transition module T7-8 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T8-9: Overall Process and MO Role Deep Dive

oneSCM *for Vans*

Purpose and benefit

This module links the **dealer view** of the application (**Chapter 8**) with the **MO view** of the functional review (**Chapter 9**). You understand what the MO reviews, how feedback reaches the dealer and how both roles complete the **overall process** together.

T8-9

Transition module

Chapter 8 to 9

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Transition at a glance

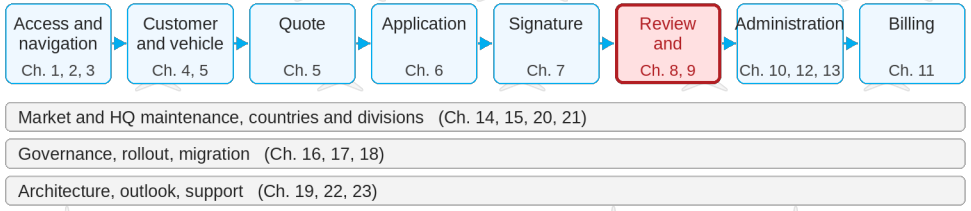

Dealer view (Chapter 8)

- Track application and read status
- Add missing data and documents
- Rejection and resubmission

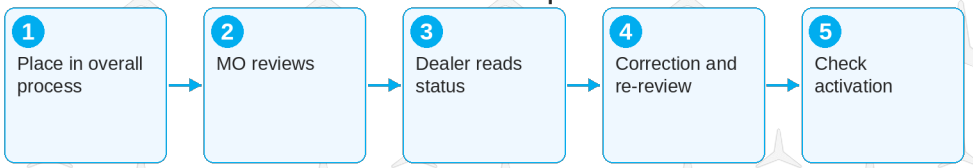

MO view (Chapter 9)

- MO Check work list
- Check criteria, check status, reasons
- Approve, reject, hand over

oneSCM process map – position of Transition module T8-9

Process view: T8-9: Overall Process and MO Role Deep Dive

How to proceed

1. Place the application in the **overall process**: submitted → under review → approved/rejected → active (Appendix D).
2. As MO, open the application from the **work list** and check it against the **criteria** (Chapters 9.2 and 9.4).
3. As dealer, read the **check status** and the **reasons** in the communication (Chapters 8.2 and 9.3).

> ! **Dealer and MO communicate via the application, not via private channels.** Reasons and queries belong in the application's communication so they remain traceable.

4. On **rejection**, the dealer corrects and resubmits; the MO reviews again (Chapters 8.7 and 9.5).
5. After **approval**, activation takes place; both roles check the result (Chapters 8.6 and 9.6).

Note: This Quick Guide summarizes transition module T8-9 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T8-9: Overall Process and MO Role Deep Dive

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: submit complete application, answer queries
- **MO**: review, approval, rejection
- **Customer Management**: activation and customer information

Prerequisites

- Application fully submitted (Chapter 8)
- MO role and check criteria known (Chapter 9.1)
- Communication channel between dealer and MO clarified

Checklist before completion

- ☐ Application status in overall process known
- ☐ Check criteria clear to both roles
- ☐ Feedback documented via the application
- ☐ Result checked by both roles

Notes and pitfalls

- Rejections always require a comment (Chapter 9).
- Special approvals from Chapter 12 go through the same MO Check.
- Contract Review profiles give the MO the overview (Chapter 9.8).

Frequently asked questions and answers

- **How does the dealer learn the review result?** Via status and communication in Application Management (Chapter 8.2).
- **Can the MO correct data directly?** The MO reviews; corrections to the application are made by the dealer (Chapter 9.5).
- **How long does an MO Check take?** Depends on completeness and work list; complete applications are processed first.

Important links and contacts

- Chapter 8 – Track and activate application.
- Chapter 9 – MO Checks and functional reviews.
- Role/status/scope matrices – Appendix D.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).

Note: This Quick Guide summarizes transition module T8-9 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T9-10: From Review Result to Ongoing Contract Administration

oneSCM *for Vans*

Purpose and benefit

This module links the **review result** (**Chapter 9**, approved and activated) with **ongoing contract administration** (**Chapter 10**). You know which data are locked upon activation, what remains changeable in day-to-day work and when changes are re-reviewed.

T9-10

Transition module

Chapter 9 to 10

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Transition at a glance

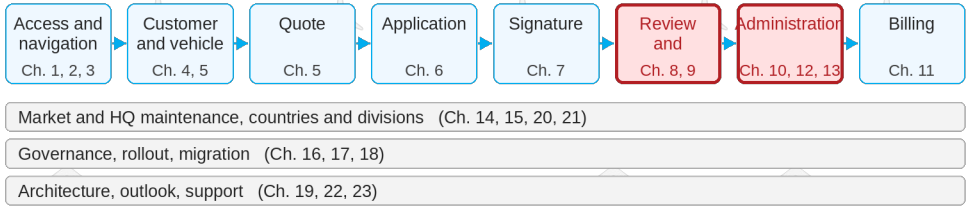

Starting point (Chapter 9)

- Review completed, contract active
- Check status and reasons in the history
- Handover to support if disputed

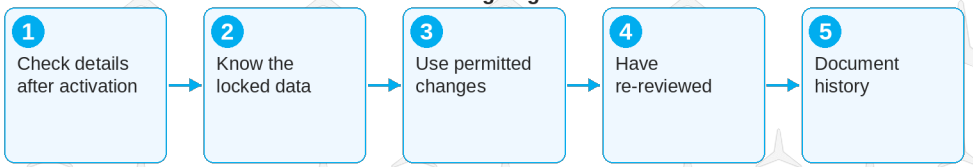

Target (Chapter 10)

- Search contract and check details
- Know permitted changes
- Have changes re-reviewed (Chapter 9.7)

oneSCM process map – position of Transition module T9-10

Process view: T9-10: From Review Result to Ongoing Contract Administration

How to proceed

1. After activation, check the **contract details** and the **payment plan** (Chapters 10.1 and 11.1).
2. Know the **locked data**: product, term, mileage, payment interval (can only be changed to "one-time").
3. In day-to-day work, use the **permitted actions**: customer and payment data, change of payer, suspension, follow-up quote (Chapters 10.2 to 10.5).

! **Activation starts the payment plan and the service entitlement.** Changes to product or term are only possible via a new contract; terminations have financial consequences (Chapters 10.6 and 11.6).

4. Changes requiring review go back into the **MO Check** (Chapter 9.7).
5. Document every change traceably in the **history** (Chapter 10.8).

Note: This Quick Guide summarizes transition module T9-10 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T9-10: From Review Result to Ongoing Contract Administration

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **MO**: complete review, review changes
- **Dealer**: administer contract day to day
- **Finance department**: payment plan and consequences

Prerequisites

- Contract status "active" (Chapter 8.6)
- Review result documented (Chapter 9.3)
- Responsibilities for changes known (Chapter 10)

Checklist before completion

- ☐ Contract details and payment plan checked after activation
- ☐ Locked data known
- ☐ Permitted changes known
- ☐ Change requiring review passed to MO

Notes and pitfalls

- The review history from Chapter 9 remains visible on the contract.
- Transition module T6-7 describes the start, this module the end of the application process.
- Reporting on active contracts in Chapter 11.7.

Frequently asked questions and answers

- **Can the MO revoke an active contract?** No, after activation the rules in Chapter 10.6 for cancellation and termination apply.
- **Which changes trigger an MO Check?** Change of payer, contract transfer and special conditions (Chapters 9.7 and 10.3).
- **Where can I see the review result later?** In the change history of the contract (Chapter 10.8).

Important links and contacts

- Chapter 9 – MO Checks and functional reviews.
- Chapter 10 – Administer contracts day to day.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes transition module T9-10 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T14-15: Linking Market Maintenance and Central Requirements

oneSCM *for Vans*

Purpose and benefit

This module links **market maintenance** (**Chapter 14**) with the **central requirements of HQ** (**Chapter 15**). You know which maintenance decisions the market makes alone, which need **HQ approval** and how **country deviations** are requested.

T14-15

Transition module

Chapter 14 to 15

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Transition at a glance

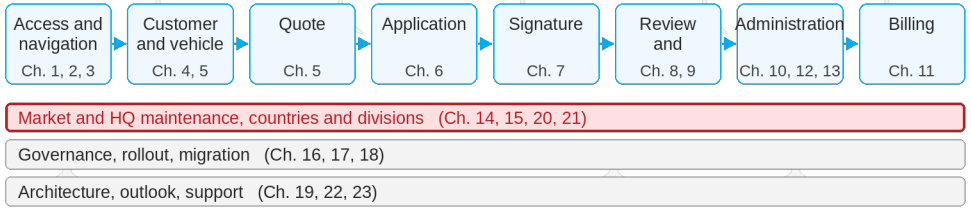

Market decides (Chapter 14)

- Market-specific settings and templates
- Price versions, campaigns, discounts within the Blueprint
- Product Testing and publication

HQ decides (Chapter 15)

- Blueprint and global standards
- Country deviations
- Technical options, SA matching, coverage codes

oneSCM process map – position of Transition module T14-15

Process view: T14-15: Linking Market Maintenance and Central Requirements

How to proceed

1. Classify the planned change: **within the Blueprint** (market decides) or **deviation** (HQ approval required).
2. Prepare the change in **Product Testing** and secure test evidence (Chapters 14.12, 16.4).
3. Request a **country deviation** from HQ with justification (Chapter 15.3) and enter it in the register (Chapter 20.6).

> ! **No publication of a deviation before HQ approval.** Unapproved deviations count as a Blueprint violation and are withdrawn.

4. Await **HQ approval** before publishing (Chapters 14.7 and 15.4).
5. Inform **MO and dealers** about effective changes (Chapter 15.5).

Note: This Quick Guide summarizes transition module T14-15 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T14-15: Linking Market Maintenance and Central Requirements

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Market**: maintenance and request for deviation
- **HQ**: Blueprint, approval, central master data
- **MO**: feedback from review

Prerequisites

- Market role with maintenance rights (Chapter 14.1)
- Blueprint and country deviation register known (Chapters 15.2, 20.6)
- Approval workflow clarified (Chapter 16.3)

Checklist before completion

- ☐ Change classified as Blueprint or deviation
- ☐ Test evidence available
- ☐ Deviation requested and registered
- ☐ Approval awaited before publication

Notes and pitfalls

- The counterpart T15-14 describes the handover of central foundations to the market.
- Coverage codes and technical options affect all markets (Chapter 15.7).
- Approvals are kept traceable in the clarification register (Appendix F).

Frequently asked questions and answers

- **May the market create a campaign without HQ?** Yes, within the Blueprint (Chapter 14.13); deviating conditions need HQ approval.
- **How long does HQ approval take?** According to the HQ governance process (Chapter 15.4); the status is in the register.
- **What happens on rejection?** The change remains unpublished; the market can request again with a new justification.

Important links and contacts

- Chapter 14 – Market role, product and price maintenance.
- Chapter 15 – HQ role, Blueprint and central master data.
- Country deviation register – Chapter 20.6.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).

Note: This Quick Guide summarizes transition module T14-15 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T15-14: Handing Over Central Foundations to Market Maintenance

oneSCM *for Vans*

Purpose and benefit

This module describes the path from **HQ** (**Chapter 15**) to the **market** (**Chapter 14**): how Blueprint changes, new **products**, **coverage codes** and **technical options** are provided centrally and **adopted, configured locally and published** by the market.

T15-14

Transition module

Chapter 15 to 14

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Transition at a glance

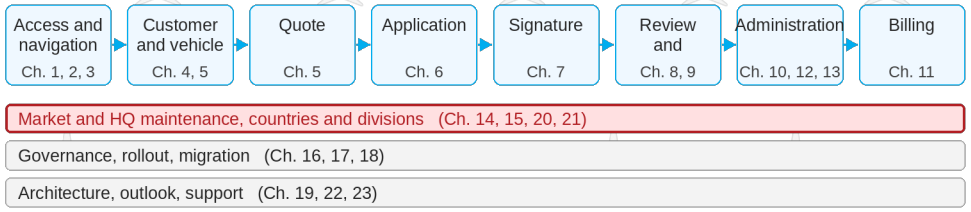

HQ provides (Chapter 15)

- Blueprint version and change overview
- Product definitions, coverage codes, technical options
- Requirements for price components and factor limits

Market adopts (Chapter 14)

- Market-specific settings and templates
- Price versions, clusters, vehicle groups
- Product Testing, approval, publication

oneSCM process map – position of Transition module T15-14

Process view: T15-14: Handing Over Central Foundations to Market Maintenance

How to proceed

1. Read the HQ **release information**: what changes in the Blueprint, and from when does it apply (Chapter 22.4)?
2. Adopt **product definitions** and **coverage codes** into market maintenance (Chapters 14.8, 15.7).
3. Configure locally: **price versions, clusters, vehicle groups, campaigns** (Chapters 14.9 to 14.13).

! **Central changes apply from the date named by HQ.** A market that delays adoption offers products outside the valid Blueprint.

4. Test in **Product Testing** and document the **functional acceptance** (Chapters 14.12, 17.3).
5. **Publish** and inform MO and dealers; update training materials (Chapters 14.7, 22.3).

Note: This Quick Guide summarizes transition module T15-14 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T15-14: Handing Over Central Foundations to Market Maintenance

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **HQ**: provide and communicate central foundations
- **Market**: adopt, configure locally, test, publish
- **MO/Dealer**: information about changes

Prerequisites

- Approved Blueprint change or new product (Chapter 15.2)
- HQ release information (Chapter 22.4)
- Market role with maintenance rights (Chapter 14)

Checklist before completion

- ☐ Release information read
- ☐ Central foundations adopted
- ☐ Configured locally and tested
- ☐ Published and communicated

Notes and pitfalls

- Counterpart to T14-15 (market requests deviation from HQ).
- Note the effect of product changes on existing contracts (Chapter 14.10).
- Division reference: Vans model series clustering (Chapter 14.11).

Frequently asked questions and answers

- **Does the market have to adopt every Blueprint change?** Yes, unless an approved country deviation says otherwise (Chapter 15.3).
- **Who maintains the prices for a new product?** The market in its price versions (Chapter 14.9) based on the HQ requirements.
- **How are dealers informed?** Via the RetailPortal and the release information (Chapter 22.4).

Important links and contacts

- Chapter 15 – HQ role, Blueprint and central master data.
- Chapter 14 – Market role, product and price maintenance.
- oneSCM RetailPortal – System news and training material.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).

Note: This Quick Guide summarizes transition module T15-14 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T15-16: From Maintenance Decision to Governance Evidence

oneSCM *for Vans*

Purpose and benefit

This module links the **HQ maintenance decision** (**Chapter 15**) with the **governance evidence** (**Chapter 16**): every decision receives a **source, test evidence, approval and version** so that it can be audited and archived.

T15-16

Transition module

Chapter 15 to 16

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Transition at a glance

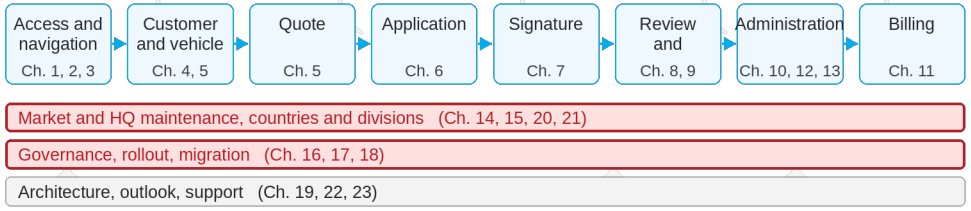

Decision (Chapter 15)

- Blueprint change or country deviation
- Technical options, SA matching, coverage codes
- Governance and approval at HQ level

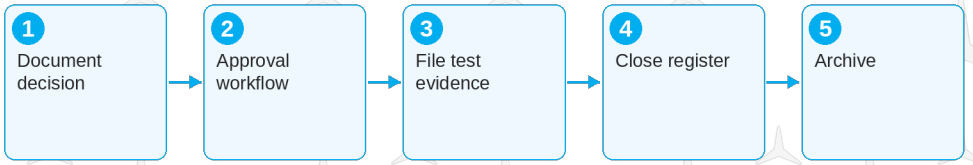

Evidence (Chapter 16)

- Functional review and approval workflow
- Test evidence and functional baseline
- Sources, tickets, versions, clarification register, archiving

oneSCM process map – position of Transition module T15-16

Process view: T15-16: From Maintenance Decision to Governance Evidence

How to proceed

1. Document the **decision** with justification, source and ticket reference (Chapter 16.6).
2. Go through the **approval workflow** with functional review (Chapter 16.3).
3. File **test evidence** and set the **functional baseline** (Chapter 16.4).

> ! **A decision without evidence is not approved.** Only with source, test evidence and documented approval does it become part of the productive functional baseline.

4. Close open entries in the **clarification register** and update the **version** (Chapter 16.7).
5. **Archive** the approved version; working documents remain in document management (Chapter 16.5).

Note: This Quick Guide summarizes transition module T15-16 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – T15-16: From Maintenance Decision to Governance Evidence

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **HQ**: make and evidence the decision
- **Editorial team**: maintain sources, versions, registers
- **Market/MO**: use and supplement evidence

Prerequisites

- Maintenance decision available (Chapter 15.4)
- Approval workflow known (Chapter 16.3)
- Access to clarification register and version control

Checklist before completion

- ☐ Decision documented with source
- ☐ Approval workflow completed
- ☐ Test evidence and functional baseline set
- ☐ Register closed, version archived

Notes and pitfalls

- Evidence is the basis for rollout and training (Chapter 17).
- Data protection also applies to evidence and test data (Chapter 16.1, Appendix I.3).
- The change overview (Chapter 22.4) is fed by this evidence.

Frequently asked questions and answers

- **What evidence does a coverage code change need?** Source, test evidence per affected division and HQ approval (Chapters 15.7, 16.4).
- **Who archives?** The editorial team after approval (Chapter 16.5).
- **How do I find the decision later?** Via version control and the clarification register (Chapter 16.6, Appendix F).

Important links and contacts

- Chapter 15 – HQ role, Blueprint and central master data.
- Chapter 16 – Governance, quality, data protection and archiving.
- Sources and clarification register – Appendix F.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).

Note: This Quick Guide summarizes transition module T15-16 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix A.1: Glossary and Abbreviations

oneSCM *for Vans*

Purpose and benefit

The **glossary** explains the terms and **abbreviations** of the oneSCM handbook consistently, from ALICE to ZB II. This guide shows how to **use** and **cite** the glossary and submit **additions**.

A.1

Appendix

Glossary

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

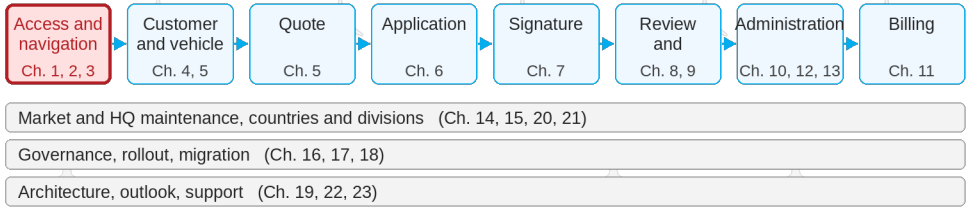

Term groups

- Roles: Dealer, MO, Market, HQ, KAM
- Transactions: price information, quote, application, contract
- Identifiers: VIN, OTR deal ID, VerSO order ID, model series

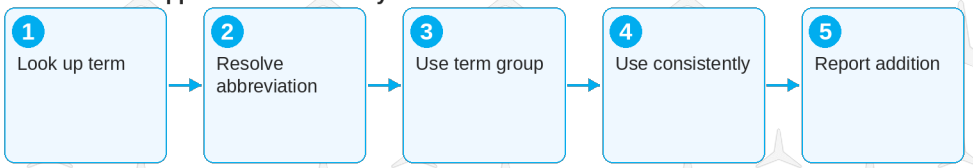

Systems and documents

- Systems: ALICE, OTR, VEGA, oneERP, NEMESIS, MPay, DATIX
- Documents: ZB I, ZB II, SEPA mandate, price information
- Status: application, signature, contract, invoice, payment status

oneSCM process map – position of Appendix A.1

Process view: Appendix A.1: Glossary and Abbreviations

How to proceed

1. Look up the term in the **glossary**; entries are sorted alphabetically and name the chapter in which the term is introduced.
2. Distinguish **abbreviation** (e.g. MO) from **long form** (Market Operation); the handbook gives the long form at first occurrence.
3. Use the **term groups** (roles, transactions, identifiers, systems, documents, status) to find related terms.

> ! **The term "contract holder" is not the same as "payer" or "user".** Roles on the contract are defined separately (Chapter 4.4); use the glossary terms exactly.

4. Use the **glossary terms** in tickets, comments and training, not local paraphrases.
5. If a term is missing or a definition is contradictory, enter it in the **clarification register** (Appendix F, Chapter 16.7).

Note: This Quick Guide summarizes Appendix A.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix A.1: Glossary and Abbreviations

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: look up terms
- **Editorial team**: maintain and approve glossary
- **Market**: local terms and language variants

Prerequisites

- Handbook or online help open
- Term or abbreviation from the process context
- Additions via the clarification register (Appendix F)

Checklist before completion

- ☐ Term found in glossary
- ☐ Long form and abbreviation known
- ☐ Chapter reference checked
- ☐ Missing term reported

Notes and pitfalls

- The glossary is part of the export and the online help (Chapter 3).
- Language variants of the terms are documented per market (Chapter 20).
- System abbreviations are explained in the profiles in Chapter 19.

Frequently asked questions and answers

- **Where do I find the meaning of "MO"?** In the glossary under M: Market Operation, the role for business review and activation (Chapter 9).
- **May I use my own abbreviations?** In tickets and comments, please use glossary terms only; propose new terms via the clarification register.
- **Is the glossary also available in English?** Language variants depend on the market (Chapter 20); see the note in the glossary.

Important links and contacts

- Glossary – Appendix A with terms and abbreviations.
- Sources and clarification register – Appendix F.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix A.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix B.1: Everyday Checklists

oneSCM *for Vans*

Purpose and benefit

The **everyday checklists** summarize, per process phase, the check items that must be met before the next step: from the **quote** through **application and signature** to **activation** and **contract management**.

B.1

Appendix
Checklists

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

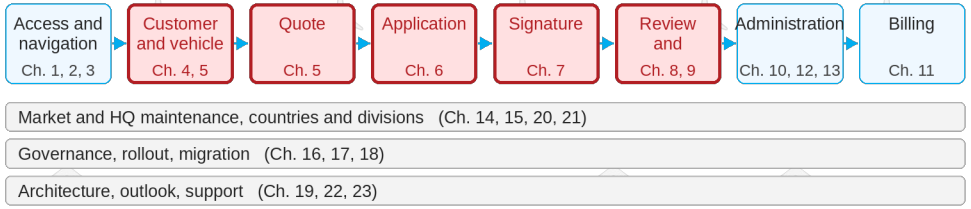

Contract process checklists

- Before the quote (Chapters 4 and 5)
- Before saving the application (Chapter 6)
- Before the signature (Chapter 7)
- Before the activation check (Chapters 8 and 9)

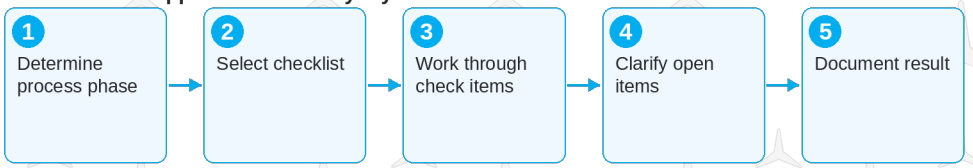

Operation and maintenance checklists

- Before contract changes (Chapter 10)
- Before handover to Finance (Chapter 11)
- Before publishing product and price (Chapter 14)
- Before approvals at HQ level (Chapter 15)

oneSCM process map – position of Appendix B.1

Process view: Appendix B.1: Everyday Checklists

How to proceed

1. Select the **checklist of the process phase** your transaction is in (process map, Chapter 3.4).
2. Work through the **check items** in order; each item refers to the chapter with the description.
3. Mark open items and clarify them **before** the next step, not afterwards.

> ! **A completed checklist does not replace the system check.** Validation rules (Chapter 6.4) and MO Checks (Chapter 9) apply regardless of the checklist.

4. For MO reviews, document the checklist result in the **check status** (Chapter 9.3).
5. If a check item is missing, report it via the **clarification register** (Appendix F).

Note: This Quick Guide summarizes Appendix B.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix B.1: Everyday Checklists

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: checklists before quote, application and signature
- **MO**: review checklist before approval
- **Market/HQ**: checklists before publication and approval

Prerequisites

- Relevant process chapter is known
- Reference number or transaction at hand
- Checklist in the current handbook version

Checklist before completion

- ☐ Appropriate checklist selected
- ☐ All check items worked through
- ☐ Open items clarified before the next step
- ☐ Missing check items reported

Notes and pitfalls

- The checklists correspond to the "Checklist before completion" sections in the chapters' Quick Guides.
- Checklists are supplemented with local items per market (Chapter 20).
- Practical examples for the checklists are in Appendix I.1.

Frequently asked questions and answers

- **Are the checklists binding?** They are working aids; the binding rules are the process rules of the chapters and the system checks.
- **Are the checklists available for printing?** Yes, Appendix B.1 is included as a print version in the handbook export (Chapter 16.5).
- **How are checklists updated?** With each release via the change overview (Chapter 22.4).

Important links and contacts

- Everyday checklists – Appendix B.1.
- Practical examples – Appendix I.1.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix B.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix C.1: Process Diagrams

oneSCM *for Vans*

Purpose and benefit

The **process diagrams** show the **process map**, the **sub-processes** from quote to contract end and the **handovers** between roles and systems. This guide explains how to **read** the diagrams and **apply** them to your transaction.

C.1

Appendix

Process diagrams

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

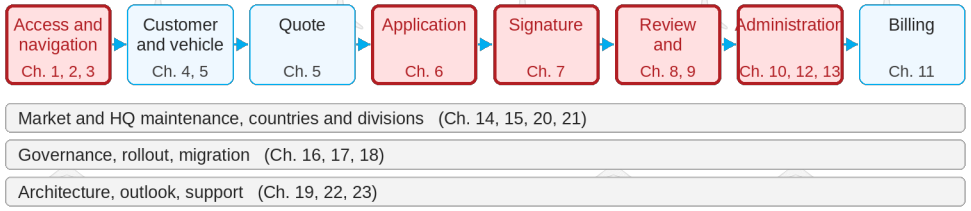

Diagrams

- Process map (overall process)
- Sub-processes: quote, application, signature, activation
- Management, termination, billing
- Market and HQ maintenance processes

Symbols

- Rectangle: process step with chapter reference
- Diamond: decision or check
- Arrow: handover, labeled with status
- Color: role that performs the step

oneSCM process map – position of Appendix C.1

Process view: Appendix C.1: Process Diagrams

How to proceed

1. Start with the **process map** and find the phase of your transaction.
2. Open the **sub-process diagram** of the phase; each step names the chapter.
3. Read the **handovers** on the arrows: Which status must be reached, which role takes over?

! **Diagrams show the standard process.** Country and division deviations (Chapters 20 and 21) are documented only there, not in the diagram.

4. Note the **decisions** (diamonds): special approval, MO Check and rejection lead to alternative paths.
5. Use the **transition modules** (T6-7 to T15-16) to move between chapters.

Note: This Quick Guide summarizes Appendix C.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix C.1: Process Diagrams

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: read diagrams and classify the transaction
- **Training**: use diagrams as an introduction
- **HQ**: maintain and approve diagrams

Prerequisites

- Basic knowledge of the process map (Chapter 3.4)
- Role and process phase known
- Diagram symbols (legend) read

Checklist before completion

- ☐ Phase found in the process map
- ☐ Sub-process read
- ☐ Handovers and status understood
- ☐ Alternative paths known

Notes and pitfalls

- The diagrams are shown in the dashboard as a click path.
- Status transitions in detail are in Appendix D.
- Diagrams are reviewed with each release (Chapter 22).

Frequently asked questions and answers

- **Which diagram do I need for application creation?** Sub-process application (Chapter 6) with transition T6-7 to signature.
- **What do the colors mean?** The role that performs the step: Dealer, MO, Market, HQ or system.
- **Can I export diagrams?** Yes, via the handbook export (Chapter 16.5).

Important links and contacts

- Process diagrams – Appendix C.1.
- Role/status/scope matrices – Appendix D.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix C.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix D.1: Role/Status/Scope Matrices

oneSCM *for Vans*

Purpose and benefit

The **matrices** show which **role** may perform which action, which **status transitions** are permitted and which **scope** (market, division, dealership) applies to visibility and editing.

D.1

Appendix

Matrices

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

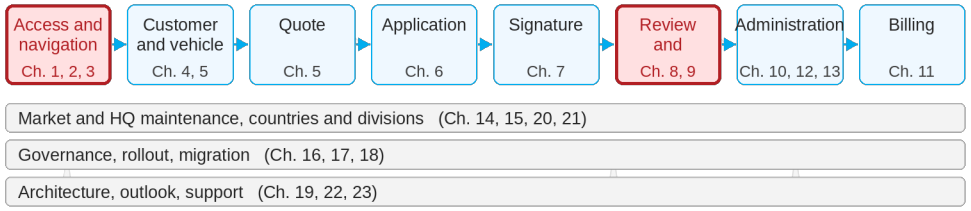

Matrices

- Role matrix: action per role (Dealer, MO, Market, HQ)
- Status matrix: permitted transitions per object (application, signature, contract)
- Scope matrix: visibility per market, division and dealership

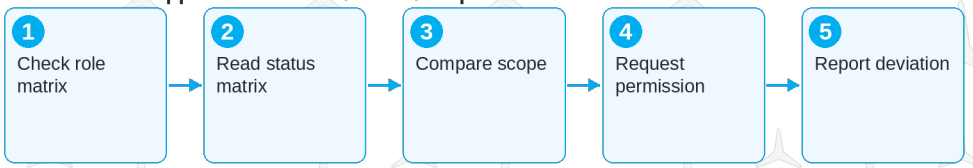

Application

- Before an action: May my role do this?
- For status questions: Which transition is possible?
- If visibility is missing: Does the scope match?

oneSCM process map – position of Appendix D.1

Process view: Appendix D.1: Role/Status/Scope Matrices

How to proceed

1. Check in the **role matrix** whether your role may perform the desired action.
2. Read in the **status matrix** which transition is permitted from which status (Chapter 8.2).
3. Check in the **scope matrix** whether market, division and dealership of the transaction match your access (Chapter 2.4).

> ! **The matrices are the binding reference for authorizations and status transitions.** A transition visible in the system but not documented must be reported, not used.

4. If a permission is missing, request the role via ALICE (Chapter 2.3); if a transition is missing, a new contract or support is required.
5. Report deviations between matrix and system via the clarification register (Appendix F).

Note: This Quick Guide summarizes Appendix D.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix D.1: Role/Status/Scope Matrices

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: look up own permissions and status transitions
- **MO/Market**: status matrix for reviews and changes
- **HQ**: maintain matrices

Prerequisites

- Role and scope of own access known (Chapter 2)
- Current status of the transaction known
- Matrix in current version

Checklist before completion

- ☐ Role may perform the action
- ☐ Status transition is permitted
- ☐ Scope matches the transaction
- ☐ Deviation reported

Notes and pitfalls

- Application, signature and contract status are separate matrices (Chapter 3.8).
- Scope restrictions explain why transactions are missing from the search (Chapter 3.2).
- The matrices are the basis of role training (Chapter 17).

Frequently asked questions and answers

- **Why can't I activate an application?** Activation is reserved for the MO or the system; see role matrix and Chapter 8.4.
- **Which transitions exist from "rejected"?** Resubmission after correction (Chapter 8.7); see status matrix.
- **Why can't I see contracts of another dealership?** The scope limits visibility to your dealership and market.

Important links and contacts

- Role/status/scope matrices – Appendix D.1.
- ALICE – authorization management – Chapter 19.16.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix D.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix E.1: Ticket-to-Chapter Mapping

oneSCM *for Vans*

Purpose and benefit

The **ticket-to-chapter mapping** links requirements, errors and clarifications (tickets) to the **handbook chapters** they affect. This lets you find the chapter for a ticket and the open tickets for a chapter.

E.1

Appendix

Ticket mapping

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

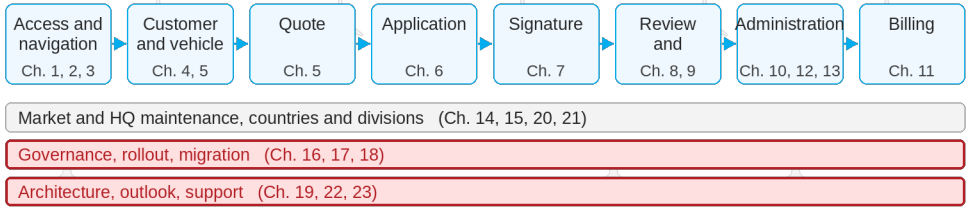

Mapping

- Ticket → chapter: Which chapters does the ticket change?
- Chapter → tickets: Which tickets are open?
- Status: open, in progress, implemented, rejected

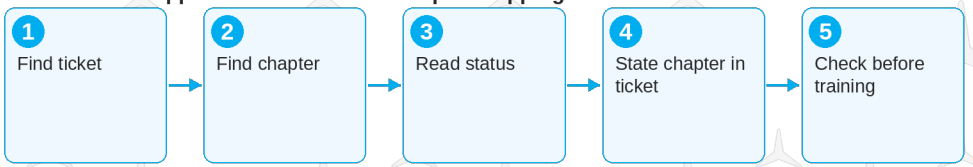

Benefit

- Release preparation (Chapter 22)
- Known errors per market and release (Chapter 23.2)
- Evidence of sources (Chapter 16.6)

oneSCM process map – position of Appendix E.1

Process view: Appendix E.1: Ticket-to-Chapter Mapping

How to proceed

1. Find the **ticket** in the mapping table; the row names chapter, status and release.
2. Conversely: find the **chapter** and check which tickets are open or in progress.
3. Read the **status**: Only implemented tickets are part of the functional baseline (Chapter 22.1).

> ! **An open ticket does not change the valid process.** Until implementation and documentation, the current version of the handbook chapter applies.

4. For a new ticket, state the **affected chapter** so that the mapping remains complete.
5. Before training sessions, check the chapter's open tickets (Chapter 22.3).

Note: This Quick Guide summarizes Appendix E.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix E.1: Ticket-to-Chapter Mapping

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Editorial team/HQ**: maintain mapping
- **Support**: assign tickets to the chapter
- **All roles**: look up ticket status for a topic

Prerequisites

- Ticket number or chapter known
- Access to the ticket system
- Version control per Chapter 16.6

Checklist before completion

- ☐ Ticket assigned to chapter
- ☐ Status checked
- ☐ Release known
- ☐ Open tickets checked before training

Notes and pitfalls

- The mapping is the basis of the change overview (Chapter 22.4).
- Market-related tickets are also listed in Chapter 23.2.
- Ticket references belong in the clarification register (Appendix F).

Frequently asked questions and answers

- **Where do I find all tickets for Chapter 7?** In the mapping, filtered by chapter; status and release are given per row.
- **Who maintains the mapping?** Editorial team and HQ as part of version control (Chapter 16.6).
- **How do I report a new ticket?** Via the support path (Chapter 23.5), stating the chapter.

Important links and contacts

- Ticket-to-chapter mapping – Appendix E.1.
- Release information – Chapter 22.4.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix E.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix F.1: Sources and Clarification Register

oneSCM *for Vans*

Purpose and benefit

The **source index** substantiates every handbook statement; the **clarification register** collects **contradictions, gaps and open questions** with status and owners. This guide shows how to **use** both and create **entries**.

F.1

Appendix

Clarification register

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

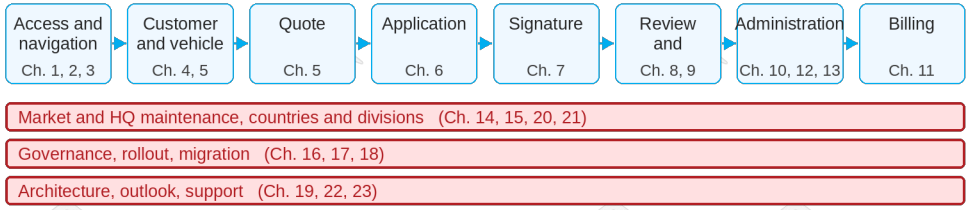

Sources

- Source type: system documentation, ticket, business decision, test
- Evidence status: confirmed, open, contradictory
- Version reference (Chapter 16.6)

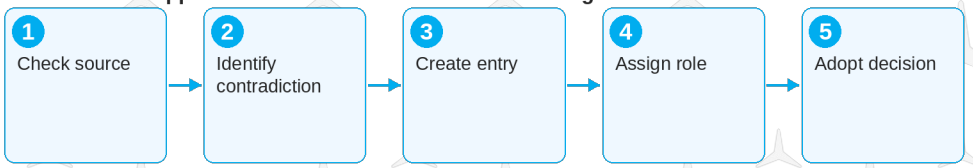

Clarification register

- Entry: chapter, statement, contradiction or gap
- Status: open, under clarification, decided
- Responsible role and due date

oneSCM process map – position of Appendix F.1

Process view: Appendix F.1: Sources and Clarification Register

How to proceed

1. For a statement, check the **source** in the source index and its **evidence status**.
2. If you find a **contradiction** or a **gap**, create an entry in the **clarification register**: chapter, statement, observation, source.
3. Assign the entry to the **responsible role** (Market, HQ, MO) and set the status to "open".

> ! **No change to the handbook without a source.** Statements without confirmed evidence are marked as open and must not be used in training (Chapter 16.4).

4. Track the **decision**; the result is adopted into the chapter and the source is updated.
5. Before releases, check the chapter's open entries (Chapter 22).

Note: This Quick Guide summarizes Appendix F.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix F.1: Sources and Clarification Register

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: report contradictions and gaps
- **Editorial team**: keep register, maintain sources
- **HQ/Market**: decide clarifications

Prerequisites

- Chapter and statement concerned
- Source or ticket reference, if available
- Access to the register

Checklist before completion

- ☐ Source and evidence status checked
- ☐ Entry created in full
- ☐ Responsible role set
- ☐ Decision adopted into chapter

Notes and pitfalls

- The register is required reading before releases and training.
- Data protection: no personal data in entries (Chapter 16.1).
- Ticket references link the register and the mapping (Appendix E).

Frequently asked questions and answers

- **What is the difference between a source and a ticket?** The source substantiates a statement; the ticket describes a change or an error. Both are referenced.
- **Who decides a clarification?** The responsible role; for Blueprint questions, HQ (Chapter 15.4).
- **How long does an entry stay open?** Until the decision; open entries are reviewed before each release.

Important links and contacts

- Sources and clarification register – Appendix F.1.
- Ticket-to-chapter mapping – Appendix E.1.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix F.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix G.1: Figure Index and Evidence

oneSCM *for Vans*

Purpose and benefit

The **figure index** lists all **screenshots and graphics** of the handbook with chapter, system, release and **evidence**. This guide shows how figures are **found**, **checked** and **newly captured**.

G.1

Appendix

Figure index

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

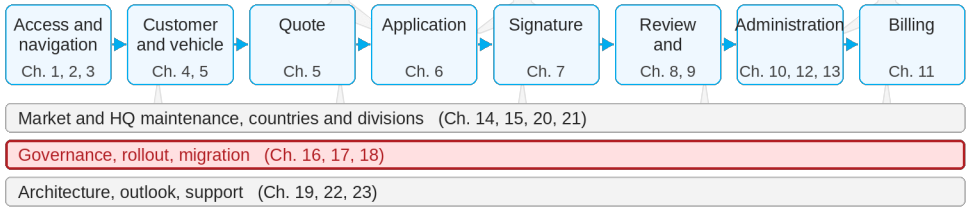

Index

- Figure number, title, chapter
- System and screen
- Release and capture date

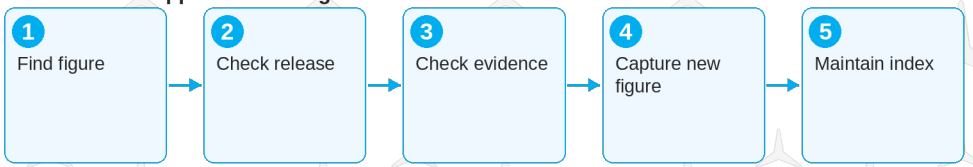

Evidence

- Test environment or production system
- Anonymized data
- Approval by business department

oneSCM process map – position of Appendix G.1

Process view: Appendix G.1: Figure Index and Evidence

How to proceed

1. Find the figure in the **figure index** by number or chapter.
2. Check **release and date**: A figure from an older release may differ from the current screen.
3. Check the **evidence**: environment, anonymized data, approval.

> ! **Screenshots with real customer, vehicle or bank data must not go into the handbook.** Use the test data catalog and redact any remaining data (Chapter 16.1).

4. For a **new figure**: capture the screen with test data (Appendix I.3), assign chapter and release, obtain approval.
5. Replace outdated figures and update the index (Chapter 16.6).

Note: This Quick Guide summarizes Appendix G.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix G.1: Figure Index and Evidence

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: assign figures to a chapter and release
- **Editorial team**: maintain figure index
- **Market**: supply local figure variants

Prerequisites

- Figure number or chapter known
- Release the figure refers to
- Safe sample data in the figure (Chapter 16.1)

Checklist before completion

- ☐ Figure found and release checked
- ☐ Evidence complete
- ☐ Data anonymized
- ☐ Index updated

Notes and pitfalls

- The Quick Guides contain process images; screenshots follow from the figure index.
- Figures may differ per market (Chapter 20).
- The index is part of the export (Chapter 16.5).

Frequently asked questions and answers

- **Where do the images in the Quick Guides come from?** Currently they are drawn process images; screenshots are added from the figure index.
- **May I use a screenshot from the production system?** Only with test data or fully anonymized and with approval (Chapter 16.1).
- **How do I report an outdated figure?** Via the clarification register with figure number and release (Appendix F).

Important links and contacts

- Figure index and evidence – Appendix G.1.
- Test data catalog – Appendix I.3.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix G.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix H.1: Knowledge Checks and Solutions

oneSCM *for Vans*

Purpose and benefit

The **knowledge checks** test understanding per chapter with questions on process, roles and status; the **solutions** explain the correct answer with a chapter reference. This guide shows their use in **training** and **self-study**.

H.1

Appendix

Knowledge checks

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

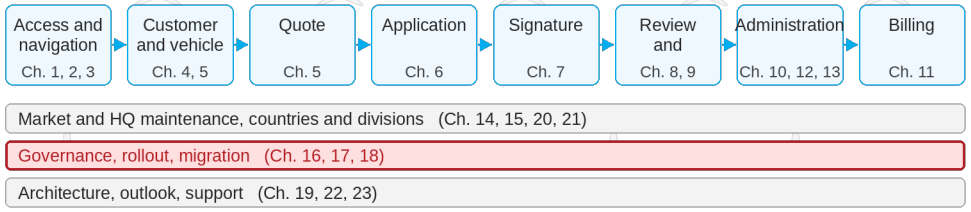

Structure

- Questions per chapter with difficulty level
- Question types: multiple choice, matching, case example
- Solutions with rationale and chapter reference

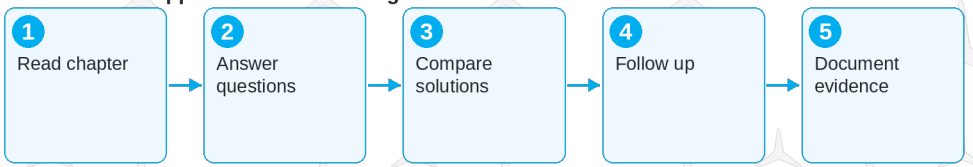

Use

- Self-study after the chapter
- Training: introduction and wrap-up
- Evidence for handover to operations (Chapter 17.4)

oneSCM process map – position of Appendix H.1

Process view: Appendix H.1: Knowledge Checks and Solutions

How to proceed

1. Read the chapter and Quick Guide before starting the **knowledge check**.
2. Answer the questions **without aids**; case examples refer to the practical examples in Appendix I.1.
3. Compare with the **solutions** and read the rationale with **chapter reference**.

! **Knowledge checks do not replace an authorization.** Access to oneSCM is granted via ALICE (Chapter 2.3), regardless of the training result.

4. Review the chapter sections for questions answered incorrectly.
5. Trainers document the result as **training evidence** (Chapter 17.4).

Note: This Quick Guide summarizes Appendix H.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix H.1: Knowledge Checks and Solutions

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Learners**: self-check after the chapter
- **Trainers**: knowledge checks in training sessions (Chapter 17.4)
- **Editorial team**: maintain and approve questions

Prerequisites

- Chapter and Quick Guide read
- Access to the knowledge checks (handbook or training material)
- Time for about ten questions per chapter

Checklist before completion

- ☐ Chapter read
- ☐ Knowledge check completed without aids
- ☐ Solutions and rationales read
- ☐ Weak points followed up

Notes and pitfalls

- Questions are reviewed with each release (Chapter 22.3).
- Local variants of the questions exist per market (Chapter 20).
- Solutions contain no personal sample data (Chapter 16.1).

Frequently asked questions and answers

- **How many questions does a knowledge check have?** About ten per chapter, depending on the chapter's scope.
- **Is there a minimum score?** The market sets this for its training (Chapter 17.4).
- **Can I repeat the knowledge check?** Yes, as often as you like; it serves as a self-check.

Important links and contacts

- Knowledge checks and solutions – Appendix H.1.
- Practical examples – Appendix I.1.
- oneSCM RetailPortal – System news and training material.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).

Note: This Quick Guide summarizes Appendix H.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix I.1: Practical Examples along the Contract Process

oneSCM *for Vans*

Purpose and benefit

The **practical examples** walk through end-to-end cases from **quote** to **termination**: business customer with collective invoice, private customer with e-signature, KAM-managed key account with special case, tyre contract. This guide shows how to **follow** the examples and use them in **training**.

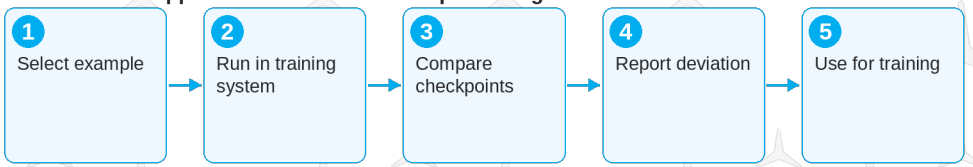

I.1

Appendix

Practical examples

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Process view: Appendix I.1: Practical Examples along the Contract Process

How to proceed

1. Select the **example** that matches your role and customer group.
2. Carry out the steps in the **training system** with the specified **test data** (Appendix I.3).
3. At each **checkpoint**, compare your status with the status documented in the example.

> ! **Run practical examples only in the training or test system.** In the production system, real applications are created and reviewed by Customer Management.

4. In case of deviations, check the chapter and clarification register; report new deviations (Appendix F).
5. Use the examples for **knowledge checks** (Appendix H) and calculation examples (Appendix I.2).

Contents at a glance

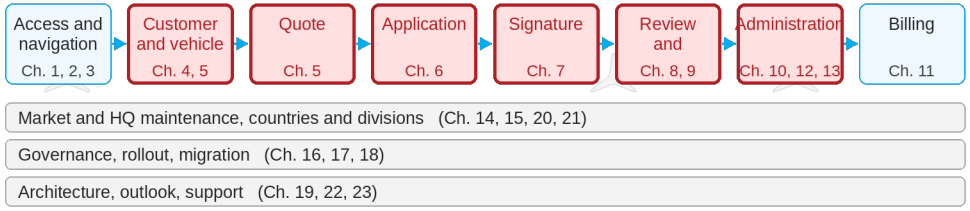

Examples

- Example 1: Business customer, collective invoice, signature by e-mail
- Example 2: Private customer, e-signature via QR code
- Example 3: KAM-managed key account with special case request
- Example 4: Tyre contract (Chapter 13)

End-to-end phases

- Quote and application (Chapters 5 and 6)
- Payment and signature (Chapter 7)
- Review and activation (Chapters 8 and 9)
- Change and termination (Chapter 10)

oneSCM process map – position of Appendix I.1

Note: This Quick Guide summarizes Appendix I.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix I.1: Practical Examples along the Contract Process

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: examples for quote, application, signature
- **MO**: examples for review and rejection
- **Trainers**: examples as practice cases

Prerequisites

- Test environment or training system
- Test data from Appendix I.3
- Chapters 4 to 10 read

Checklist before completion

- ☐ Appropriate example selected
- ☐ Run with test data in the training system
- ☐ Status compared at checkpoints
- ☐ Deviations reported

Notes and pitfalls

- Example 1 corresponds to the case in the Vans template "Application creation and management".
- Division differences are marked in the examples (Chapter 21).
- Checkpoints correspond to the checklists in Appendix B.

Frequently asked questions and answers

- **Which example suits Vans dealers?** Example 1 (business customer) and Example 2 (private customer), both with Vans identifiers.
- **Are there examples of rejections?** Yes, Example 3 contains a special case request with rejection and resubmission.
- **Where does the test data come from?** From the test data catalog in Appendix I.3.

Important links and contacts

- Practical examples – Appendix I.1.
- Test data catalog – Appendix I.3.
- Calculation examples – Appendix I.2.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).

Note: This Quick Guide summarizes Appendix I.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix I.2: Calculation Examples and Finance Reference

oneSCM *for Vans*

Purpose and benefit

The **calculation examples** show how **price, payment interval, term and mileage** affect the payment plan, **final settlement** and **refund**, and how **discounts and campaigns** take effect. This guide explains the examples step by step.

I.2

Appendix

Calculation examples

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

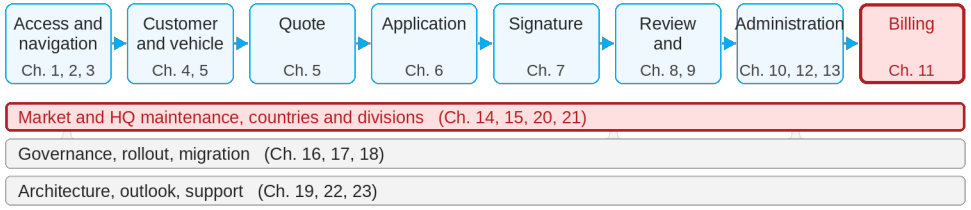

Examples

- Payment plan: one-off versus monthly
- Term and mileage: effect on the price
- Campaign and dealer discount in the quote
- Early termination: final settlement and refund

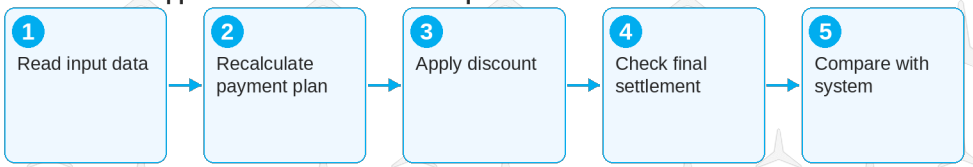

Finance reference

- Invoicing (Chapter 11.1)
- Price components and Cost Unit Split (Chapter 14.14)
- Posting in NEMESIS, payment via MPay (Chapter 19)

oneSCM process map – position of Appendix I.2

Process view: Appendix I.2: Calculation Examples and Finance Reference

How to proceed

1. Read the example's **input data**: product, term, mileage, payment interval.
2. Follow the **payment plan**: total price, number and amount of installments, due dates.
3. Apply the **campaign or discount** and check the effect on the payment plan.

! **The calculation examples use sample prices.** Only the market's price version and the price information from oneSCM are binding.

4. Recalculate the **final settlement** for early termination: used share, refund, correction (Chapter 11.6).
5. Compare your result with the **price information** (PDF) from the system (Chapter 5.6).

Note: This Quick Guide summarizes Appendix I.2 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix I.2: Calculation Examples and Finance Reference

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: explain payment plan and price information
- **Finance department**: final settlement and corrections
- **Market**: price components and factors (Chapters 14.9, 14.14)

Prerequisites

- Product and configuration of the sample contract
- Market's price version known
- Chapter 11 read

Checklist before completion

- ☐ Input data understood
- ☐ Payment plan recalculated
- ☐ Discount effect checked
- ☐ Final settlement followed

Notes and pitfalls

- The payment interval can later only be changed to "one-off" (Chapter 6).
- Refunds are handled by the Finance department (Chapter 11.6).
- Factor limits and clusters are described in Chapter 14.9.

Frequently asked questions and answers

- **Why does my result differ from the price information?** Check price version, campaign conditions and rounding rules; in case of doubt, the system applies.
- **How is the refund calculated?** Pro rata by term and mileage per Chapter 11.6; the example shows the steps.
- **Does the example apply to Cars and Vans?** The calculation logic does; prices differ per division (Chapter 21.3).

Important links and contacts

- Calculation examples and finance reference – Appendix I.2.
- Invoice, payment, costs – Chapter 11.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix I.2 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix I.3: Test Data Catalog and Evidence

oneSCM *for Vans*

Purpose and benefit

The **test data catalog** provides safe **sample customers, vehicles, products and payment data** for training, tests and screenshots and documents the **evidence** per test case. This guide shows how to **select** test data and file **evidence**.

I.3

Appendix

Test data

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

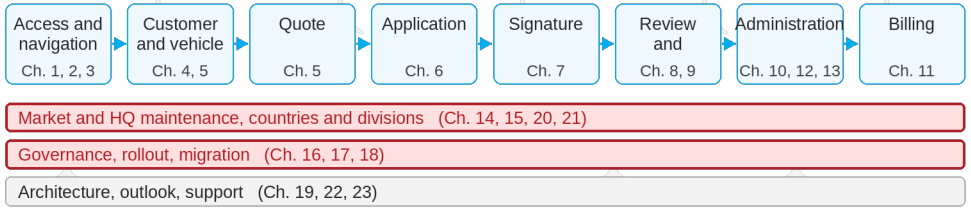

Catalog

- Test customers: private, business, KAM
- Test vehicles per division with VIN, model series, OTR deal ID
- Test products, campaigns, bank details (test accounts)

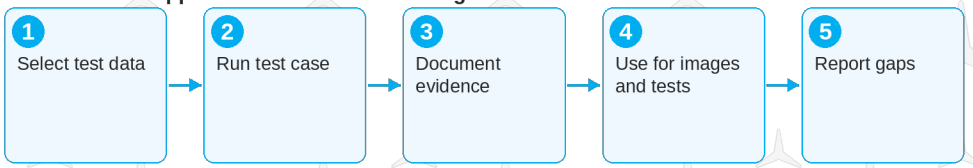

Evidence

- Test case, date, release, environment
- Result and deviation
- Reference to ticket and chapter (Appendix E)

oneSCM process map – position of Appendix I.3

Process view: Appendix I.3: Test Data Catalog and Evidence

How to proceed

1. Select the customer, vehicle and product from the **catalog** to match the test case or practical example.
2. Run the test case in the **test or training system**; use only test accounts for bank details.
3. Document the **evidence**: test case, date, release, environment, result.

> ! **Real customer, vehicle or bank data are not test data.** Test data come exclusively from the catalog; production data are not permitted in tests and images (Chapter 16.1).

4. Also use test data for **screenshots** (Appendix G) and **Product Testing** (Chapter 14.12).
5. Report unusable or missing test data to the editorial team (Appendix F).

Note: This Quick Guide summarizes Appendix I.3 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Appendix I.3: Test Data Catalog and Evidence

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Trainer/tester**: use test data
- **Market**: Product Testing (Chapter 14.12)
- **Editorial team**: maintain catalog and evidence

Prerequisites

- Training or test system
- Test case or practical example (Appendix I.1)
- Data protection rules (Chapter 16.1)

Checklist before completion

- ☐ Test data selected from the catalog
- ☐ Test case run in the test system
- ☐ Evidence fully documented
- ☐ Missing test data reported

Notes and pitfalls

- Test vehicles are available per division with matching identifiers (Chapter 21.2).
- Evidence is a prerequisite for the productive functional baseline (Chapter 16.4).
- The catalog is updated with each release (Chapter 22).

Frequently asked questions and answers

- **May I create a real vehicle in the training system?** No, only test vehicles from the catalog.
- **Where do I file the evidence?** In the evidence register of the catalog with reference to test case and release.
- **Are there test data for tyre contracts?** Yes, test products with tyre type and tyre size (Chapter 13).

Important links and contacts

- Test data catalog and evidence – Appendix I.3.
- Product Testing – Chapter 14.12.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Appendix I.3 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – V.1: Welcome and Document Context

oneSCM *for Vans*

Purpose and benefit

The **preface** explains **who** the oneSCM handbook is written for, **which version** applies, how **variants** per role, market and division are created and how to give **feedback**. This guide is the entry point before all chapters.

V.1

Preface

Welcome

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

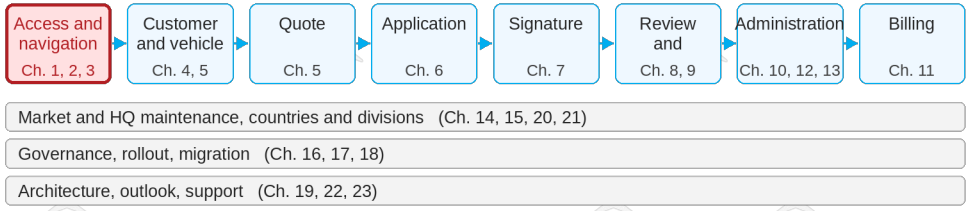

Document context

- Target groups: Dealer, MO, Market, HQ
- Validity: version, release, date
- Variants per role, market and division

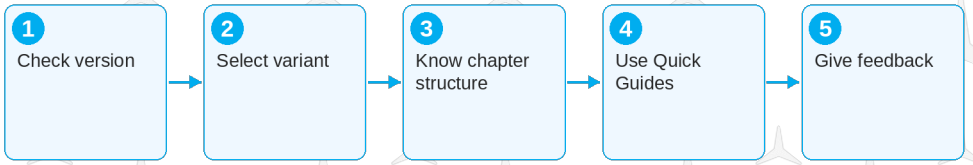

Working with the handbook

- Chapter structure (purpose, prerequisites, steps, result, notes)
- Quick Guides per chapter
- Feedback and clarification register

oneSCM process map – position of Preface V.1

Process view: V.1: Welcome and Document Context

How to proceed

1. Check the **version and date** of the handbook; they appear in the footer of every page.
2. Select the **variant** for your role, your market and your division.
3. Get to know the **chapter structure**: purpose, prerequisites, roles, steps, result, special cases, notes, troubleshooting, sources.

! **Only the current version of the handbook is valid.** Older exports may contain outdated processes; check date and release (Chapter 22.4).

4. Use the **Quick Guides** as a summary and the handbook for details.
5. Give **feedback** via the clarification register or the feedback function of the online help (Appendix F).

Note: This Quick Guide summarizes preface V.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – V.1: Welcome and Document Context

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: know the document context
- **Editorial team**: maintain version and variants
- **Market**: approve local variants

Prerequisites

- Handbook version and date (see footer)
- Your own role, market and division
- Access to the handbook or the online help

Checklist before completion

- ☐ Version and date checked
- ☐ Appropriate variant selected
- ☐ Chapter structure known
- ☐ Feedback channel known

Notes and pitfalls

- The reading path per role is in V.2.
- Terms are explained in the glossary (Appendix A).
- Data protection rules for examples in Chapter 16.1.

Frequently asked questions and answers

- **Who is the handbook for?** For all roles in oneSCM: Dealer, MO, Market and HQ, with variants per market and division.
- **How do I recognize the valid version?** By the date in the footer and the release information (Chapter 22.4).
- **Where do I give feedback?** Via the clarification register (Appendix F) or the feedback function of the online help.

Important links and contacts

- Table of contents and reading paths – V.2.
- Glossary – Appendix A with terms and abbreviations.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes preface V.1 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – V.2: Table of Contents and Reading Paths

oneSCM *for Vans*

Purpose and benefit

The **table of contents** shows the 23 chapters, appendices and transition modules; the **reading paths** recommend the order of chapters per **role**. This guide helps you quickly find the right entry point.

V.2

Preface

Reading paths

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Contents at a glance

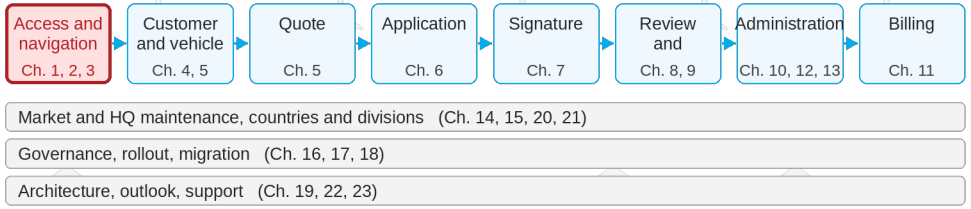

Reading paths

- Dealer: 1, 2, 3, 4, 5, 6, T6-7, 7, T7-8, 8, 10, 12, 23
- MO: 1, 2, 3, 8, T8-9, 9, T9-10, 10, 11, 16
- Market: 1, 2, 14, T14-15, 15, 20, 21, 17
- HQ: 1, 15, T15-14, T15-16, 16, 19, 22

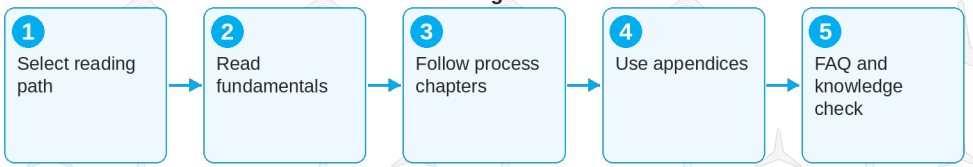

Structure

- Main part: Chapters 1 to 23
- Transition modules T6-7 to T15-16
- Appendices A to I
- Preface V.1 and V.2

oneSCM process map – position of Preface V.2

Process view: V.2: Table of Contents and Reading Paths

How to proceed

1. Select the **reading path for your role** and read the **fundamentals** first (Chapters 1 to 3).
2. Follow the **process chapters** in the order of the reading path; the **transition modules** link them.
3. For each chapter, use the **Quick Guide** as a summary and checklist.

> ! **The reading paths are recommendations, not authorizations.** Which chapters you may carry out in the system is determined by role and scope (Appendix D).

4. Consult the **appendices** as needed: glossary, checklists, matrices, practical examples.
5. Finish with **Chapter 23** (FAQ and support) and the **knowledge check** (Appendix H).

Note: This Quick Guide summarizes preface V.2 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – V.2: Table of Contents and Reading Paths

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **Dealer**: reading path contract process
- **MO**: reading path review and administration
- **Market/HQ**: reading path maintenance and governance

Prerequisites

- Your own role known (Chapter 1.3)
- Access to the handbook
- Fundamentals Chapters 1 to 3 read or scheduled

Checklist before completion

- ☐ Reading path for the role selected
- ☐ Fundamentals read
- ☐ Process chapters worked through in order
- ☐ Appendices used as needed

Notes and pitfalls

- The dashboard shows the structure and the click path interactively.
- Country and division chapters (20, 21) supplement every reading path.
- New chapters are added to the reading paths with releases (Chapter 22).

Frequently asked questions and answers

- **Do I have to read all 23 chapters?** No, the reading path for your role names the relevant chapters; the others are for reference.
- **Where are the transition modules?** Between the chapters they link, e.g. T6-7 between Chapters 6 and 7.
- **Are there reading paths per market?** Reading paths apply per role; market specifics are in Chapter 20.

Important links and contacts

- Welcome and document context – V.1.
- Handbook dashboard – Structure and click path.
- oneSCM Handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.

Note: This Quick Guide summarizes preface V.2 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.
