oneSCM – IT Architecture

oneSCM *for Vans*

Purpose and benefit

You know the **system map** and the connected systems for **order, vehicle, contract, finance, payment and authorization data**, the **integration paths**, the **interface operation with error handling** as well as the **individual system profiles** (Chapter 19.1 to 19.31).

19

Chapter 19 of 23

Architecture, outlook, support

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

Order and vehicle (19.2 – 19.10)

- GO – Cars order information
- AFAB – Vans order information
- CEPRO – Vans vehicle master data
- OTR – Order and vehicle reference
- DSB – Mileage reading
- Warranty-and-Goodwill-API, MIC
- VEGA – Contract, coverage, claim
- BS4 or SDB4

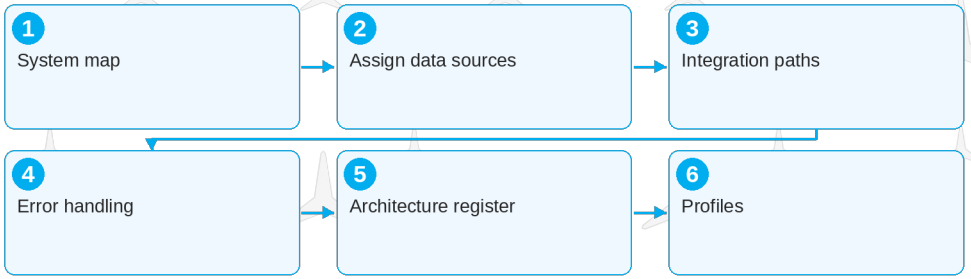

Finance, payment, authorization (19.11 – 19.17)

- oneERP – Customer and finance integration
- CoFiCo and SWT – FI connection
- NEMESIS – Accounting
- MPay – Payment
- ALICE – Authorizations
- DATIX – Manual handover

Operation and profiles (19.18 – 19.31)

- Other systems, data platforms, legacy
- Integration paths and interface operation
- Architecture register
- Profiles: VeDoc, VERSO/VOM, oneDoC, Xentry, MBFS Bundling, POS channels, insurers, suppliers

Process view: IT Architecture

How to proceed

1. Start with the **architecture overview and system map** (19.1).
2. Assign the data sources per process step:
   - Vehicle and order: GO, AFAB, CEPRO, OTR, MIC, DSB (19.2 to 19.8)
   - Contract and services: VEGA, BS4/SDB4, Warranty-and-Goodwill-API (19.7, 19.9, 19.10)
   - Customer and finance: oneERP, CoFiCo, SWT, NEMESIS, MPay (19.11 to 19.15)
   - Access: ALICE (19.16); manual handover: DATIX (19.17)
3. Know the **technical integration paths** (19.21) and the **interface operation** with **error handling** (19.22).

> ! **Do not work around interface errors with manual duplicate maintenance.** Report the error with reference number and system to Support; DATIX is only the documented manual handover path.

4. Use the **architecture register** for open evidence (19.23).
5. Look up the **individual system profiles** as needed (19.24 to 19.31).

Note: This Quick Guide summarizes Chapter 19 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – IT Architecture

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **HQ/IT**: architecture, interface operation
- **Market/MO**: error handling and evidence
- **Dealer**: understanding of data origin

Prerequisites

- Basic understanding of the contract process (Chapter 3)
- Access to the architecture register (19.23)
- Support path for interface errors known (Chapter 23)

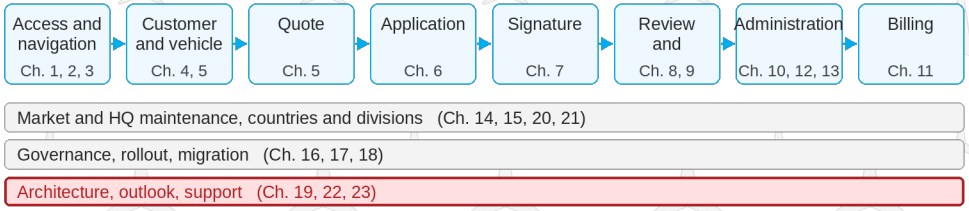

Checklist before completion

- ☐ System map understood
- ☐ Data source per process step known
- ☐ Error path for interface failures known
- ☐ Profile of the affected system read

Notes and pitfalls

- Cars and Vans use different order systems (GO or AFAB/CEPRO).
- Van master data arrives via the CeproImport batch job; report batch job incidents with job name and time (19.4, 19.22).
- Legacy systems (19.20) run only until the cutover (Chapter 18.6).

oneSCM process map – position of Chapter 19

Frequently asked questions and answers

- **Where does the vehicle data in the application come from?** Depending on the entry point, from OTR, VERSO/VOM or MIC; Vans master data from CEPRO (19.4 to 19.8).
- **What does VEGA do?** VEGA maintains contract, coverage and claim for claiming services (19.9).
- **When is DATIX used?** Only for the documented manual handover when no automated path exists (19.17).

Important links and contacts

- Architecture register and open evidence – Chapter 19.23.
- Interface operation and error handling – Chapter 19.22.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 19 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.
