oneSCM – Customers, Partners and Contract Roles

oneSCM *for Cars*

Purpose and benefit

You distinguish **private and business customers**, find **existing customers**, check **mandatory data**, assign the **contract roles** (holder, payer, user, contact, invoice recipient) and avoid **duplicates** (Chapter 4.1 to 4.8).

4

Chapter 4 of 23

Customer and vehicle

This document is interactive – references to handbook chapters and systems are provided as links.

Topics at a glance

4.1 – 4.3 Entering customers

- Private customers and business customers
- Searching for and assigning existing customers
- Checking customer data and mandatory data

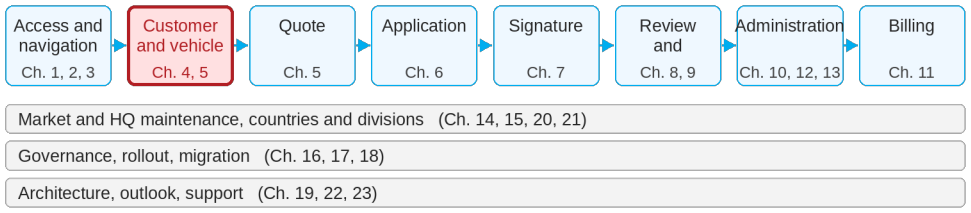

4.4 – 4.6 Roles and quality

- Contract holder, payer, user, contact, invoice recipient
- Data transfer from connected systems
- Duplicates and conflicting master data

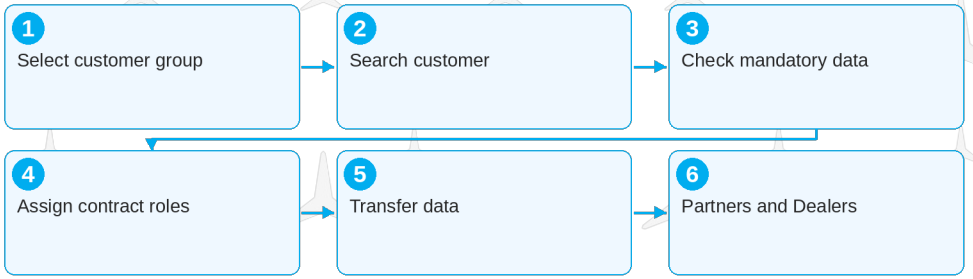

4.7 – 4.8 Partners

- Partner and Dealer relationships
- Dealer onboarding and partner process

oneSCM process map – position of Chapter 4

Process view: Customers, Partners and Contract Roles

How to proceed

1. Select the **customer group** (4.1). "KAM-managed key accounts" only for individual price requests or FS 140+.
2. First **search** for the customer and select them; only create a new record if needed (4.2). Identification is based on:
   - Private customer: first and last name, phone number, e-mail address or Mercedes me ID
   - Business customer: company name, VAT ID
3. Check **mandatory data** and plausibility (4.3): address, contact details, legal form; errors block later checks.

> ! **Contract holder and registered keeper of the vehicle must be identical.** A different contract holder is not permitted; only payer and invoice recipient may differ.

4. Assign the **contract roles** (4.4): contract holder, payer, user, contact and invoice recipient may differ, but must be permitted per market.
5. Transfer data from **connected systems** (4.5, e.g. oneERP) instead of retyping it; check for **duplicates** and conflicts (4.6).
6. Maintain **partner and Dealer relationships** (4.7); new dealers go through **Dealer onboarding** (4.8).

Note: This Quick Guide summarizes Chapter 4 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Customers, Partners and Contract Roles

oneSCM *for Cars*

Roles and prerequisites

Roles involved

- **Dealer**: customer search, new creation, role assignment
- **MO**: review of master data and duplicates
- **Market**: Dealer onboarding and partner process

Prerequisites

- Customer group is known (private, business, KAM-managed key accounts)
- Customer identification data is available
- Data protection notes are observed (Chapter 16.1)

Checklist before completion

- ☐ Customer searched, no duplicate created
- ☐ Customer group selected correctly
- ☐ Mandatory data complete and plausible
- ☐ Contract roles assigned and permitted

Notes and pitfalls

- Duplicates usually result from creating new records without searching first; the MO can reject them.
- Personal data does not belong in comments or screenshots (Chapter 16.1).
- When transferring data from external systems, the leading system is authoritative (Chapter 16.2).

Frequently asked questions and answers

- **May the payer differ from the contract holder?** Yes, the payer and the invoice recipient may differ; the contract holder must be the registered keeper.
- **What to do about conflicting master data?** Do not overwrite; document the deviation and pass it to the leading system or to support (Chapter 4.6).
- **How is a new Dealer connected?** Via the partner process and the market's Dealer onboarding (Chapter 4.8).

Important links and contacts

- Customer Account Center – Customer accounts and special cases (Chapter 12.8).
- oneERP – Customer and finance integration (Chapter 19.11).
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).
