oneSCM – Basics, Navigation and Customer Journey

oneSCM *for Vans*

Purpose and benefit

You find your way around the **start page and menu**, use **search and filters**, know the **interaction patterns** and place the contract process from **price information** to **contract** on the **process map** (Chapter 3.1 to 3.9).

3

Chapter 3 of 23

Access and navigation

This document is interactive – references to handbook chapters and systems are provided as links.

Topics at a glance

3.1 – 3.3 User interface

- Start page and menu
- Search and filters
- UI elements and interaction patterns

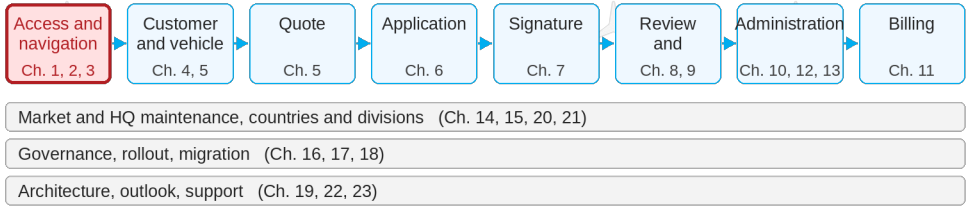

3.4 – 3.6 Customer Journey

- Process map
- Price information, quote, application and contract
- Lead and CRM handover

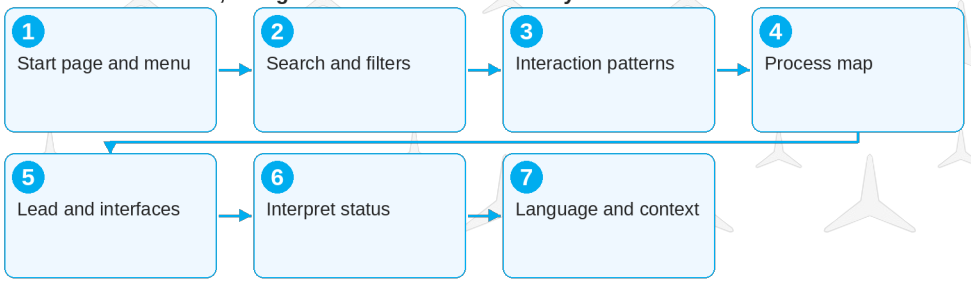

3.7 – 3.9 Status and context

- Interfaces and system handovers
- Interpreting status information correctly
- Personal work context and languages

oneSCM process map – position of Chapter 3

Process view: Basics, Navigation and Customer Journey

How to proceed

1. Start on the **start page** (3.1): The tiles lead to **Contract Creation**, **Application Management**, **Customer Management** as well as warranty packages and external portals.
2. Use **search and filters** (3.2): reference number, VIN, customer name or status narrow down lists. Columns such as "Actions" are reached via the horizontal slider.
3. Recognize the **interaction patterns** (3.3): step bar with check marks, toggles for optional entries, three-dot menu for actions, mandatory fields marked with an asterisk.
4. Place your case on the **process map** (3.4 and 3.5): price information → quote → application → contract.

> ! **A green check mark in the step bar does not mean that the contract is active.** Only the contract status "active" after review and activation (Chapter 8) is binding.

5. Take over **leads** from the CRM and return results (3.6); note the **system handovers** to OTR, VEGA and oneERP (3.7).
6. Read **status information** correctly (3.8): application status, signature status and contract status are separate values.
7. Set your **work context and language** (3.9); documents follow the market's language variant (Chapter 7.4).

Note: This Quick Guide summarizes Chapter 3 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – Basics, Navigation and Customer Journey

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **All roles**: navigation, search, understanding status
- **Dealer**: customer journey from lead to contract
- **MO/Market**: status information and system handovers

Prerequisites

- Successful login with correct context (Chapter 2)
- Basic knowledge of the process map
- Personal work context and language are set

Checklist before completion

- ☐ Start page and main menu are known
- ☐ Search by reference number and VIN works
- ☐ Process phase of the case is clear
- ☐ Language and work context are set

Notes and pitfalls

- The status overview with permitted transitions is in Chapter 8.2 and Appendix D.
- The search only finds cases in your own market and dealership context.
- Browser zoom below 100 % hides columns; use the slider.

Frequently asked questions and answers

- **Where can I find a saved application again?** Under Contract Creation › Application Management via the reference number (Chapter 8.1).
- **What is the difference between a quote and an application?** The quote is non-binding price information; the application is saved, signed, reviewed and activated.
- **Can I use the interface in another language?** Yes, via the personal work context (3.9); contract documents follow the market's language variants.

Important links and contacts

- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- Process diagrams – Appendix C with process map and sub-processes.
- Glossary – Appendix A with terms and abbreviations.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).

Note: This Quick Guide summarizes Chapter 3 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.
