oneSCM – HQ Role, Blueprint and Central Master Data

oneSCM *for Vans*

Purpose and benefit

You know the **tasks and scope of the HQ role**, maintain the **Blueprint** and **global standards**, handle **country deviations**, steer **governance and approvals**, work together with **Market and MO** and are responsible for **Technical Options, SA matching and coverage codes** (Chapter 15.1 to 15.7).

15

Chapter 15 of 23

Market and HQ maintenance, countries and divisions

This document is interactive – references to handbook chapters and systems are provided as links.

Topics at a glance

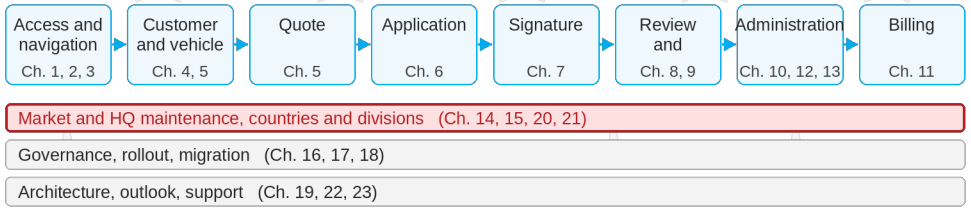

15.1 – 15.4 Blueprint and governance

- Tasks and scope of the HQ role
- Blueprint maintenance and global standards
- Handling country deviations
- Governance and approvals at HQ level

15.5 – 15.7 Collaboration and master data

- Collaboration with Market and MO
- Task description versus documented navigation
- Technical Options, SA matching and coverage codes

oneSCM process map – position of Chapter 15

Process view: HQ Role, Blueprint and Central Master Data

How to proceed

1. Distinguish the **HQ role** from Market and MO (15.1).
2. Maintain the **Blueprint** and the **global standards** as the binding basis for all markets (15.2).
3. Assess **country deviations** and approve or reject them (15.3); record the result in the register (Chapter 20.6).

> ! **Changes to coverage codes and SA matching affect all markets and divisions.** They are published only after approval and with test evidence (Chapter 16.4).

4. Steer **governance and approvals** at HQ level (15.4) following the approval workflow from Chapter 16.3.
5. Align with **Market and MO** (15.5); distinguish between **task description** and **documented navigation** in the system (15.6).
6. Maintain **Technical Options, SA matching and coverage codes** centrally (15.7); they control product assignment and claiming of services.

Note: This Quick Guide summarizes Chapter 15 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

oneSCM – HQ Role, Blueprint and Central Master Data

oneSCM *for Vans*

Roles and prerequisites

Roles involved

- **HQ**: Blueprint, global standards, central master data
- **Market**: local configuration and feedback (Chapter 14)
- **MO**: check rules and quality feedback (Chapter 9)

Prerequisites

- HQ role with central maintenance rights
- Governance process and approval levels known (Chapter 16)
- Country deviation register accessible (Chapter 20.6)

Checklist before completion

- ☐ Blueprint change justified and approved
- ☐ Country deviation assessed and in the register
- ☐ Technical Options and coverage codes tested
- ☐ Market and MO informed

Notes and pitfalls

- The Blueprint is the reference for training and handbook; deviations are documented per country (Chapter 20).
- HQ approvals are traceable in the clarification register (Appendix F).
- Transition modules T15-14 and T15-16 connect HQ maintenance with Market and governance.

Frequently asked questions and answers

- **What is the Blueprint?** The global standard process with products, rules and master data from which markets may deviate only in a documented way (15.2).
- **Who maintains coverage codes?** HQ centrally; markets use them in product definition and claiming of services (15.7).
- **How do HQ and Market proceed in case of conflicts?** Via the clarification register and the governance approval (15.4 and 16.7).

Important links and contacts

- Transition module T15-14 – Handing over central foundations to market maintenance.
- Transition module T15-16 – From the maintenance decision to governance evidence.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapters 23.4 and 23.5).
