oneSCM – Creating a Service Contract and Completing the Application

oneSCM *for Vans*

Purpose and benefit

You check **prerequisites and contract type**, enter **contract data and mandatory fields**, check **customer, vehicle and product assignment**, understand **validation rules** and save the **application** with a **reference number** (Chapter 6.1 to 6.7).

6

Chapter 6 of 23

Application

References to handbook chapters and systems are highlighted; e-mail addresses are provided as links.

Topics at a glance

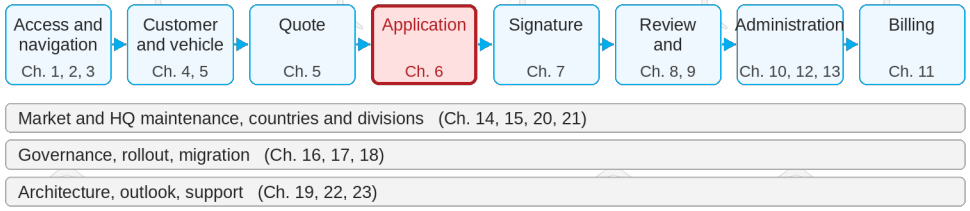

6.1 – 6.3 Entering

- Checking prerequisites and contract type
- Entering contract data and mandatory fields
- Checking customer, vehicle and product assignment

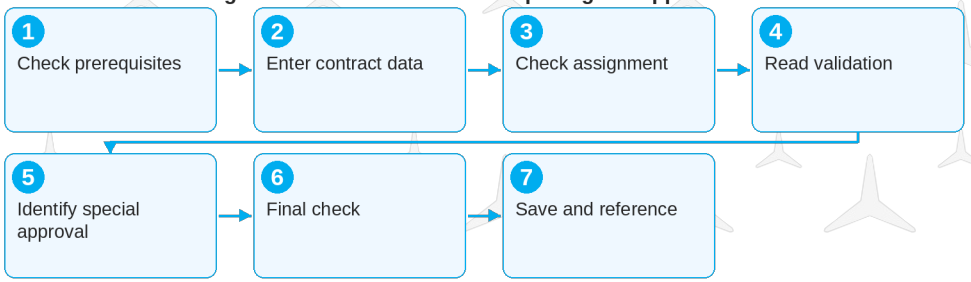

6.4 – 6.7 Checking and saving

- Validation rules and error messages
- Identifying special approvals in the standard process
- Overview and final check
- Saving the application and checking the reference

Process view: Creating a Service Contract and Completing the Application

How to proceed

1. Check **contract type and prerequisites** (6.1): vehicle, product and customer group must match the contract type.
2. Enter the **contract data** (6.2): mandatory fields are marked with an asterisk; missing entries block saving.
3. In the **payment plan** section, check the assignment of **customer, vehicle and product** (6.3) and use the **application preview** (PDF).
4. Read **validation messages** (6.4): red messages must be resolved; yellow notes allow you to continue.

! **The payment interval can later only be changed to "one-time"**; other changes require a new contract.

5. Identify **special approvals** (6.5): deviating conditions or customer groups trigger an MO review (Chapter 9 and 12.4).
6. Carry out the **final check** in the overview (6.6) and click the **check mark** to proceed to signing.
7. **Save** the application and note the **reference number** (6.7); it is the key for Application Management and support.

Note: This Quick Guide summarizes Chapter 6 of the oneSCM handbook. Details, screenshots and evidence can be found in the handbook.

Roles and prerequisites

Roles involved

- **Dealer**: enter, check and save application
- **MO**: special approvals and review (Chapter 9)
- **Market**: validation rules per market

Prerequisites

- Quote is prepared (Chapter 5)
- Customer is assigned (Chapter 4)
- Role for application creation is activated (Chapter 2)

Checklist before completion

- ☐ Contract type and prerequisites checked
- ☐ Mandatory fields complete, no red messages
- ☐ Customer, vehicle and product assigned correctly
- ☐ Application saved, reference number noted

Notes and pitfalls

- In the handbook example, an application is submitted for a business customer; deviations for private customers and KAM-managed key accounts are marked.
- You activate a collective invoice during the customer data check via the toggle at the bottom of the page.
- Saved applications can be found under Application Management (Chapter 8.1).

Frequently asked questions and answers

- **Can I change the application after saving?** To a limited extent: first registration, license plate and documents via "Update" (Chapter 8.3); conditions require a new contract.
- **What does a special approval mean?** The application deviates from the standard and is reviewed by the MO before it can be activated (Chapter 9 and 12.4).
- **Where can I see the reference number?** In the overview after saving and in the first column of Application Management.

Important links and contacts

- Transition module T6-7 – From saved application to payment data and signature.
- oneSCM handbook – Complete chapters with screenshots, role, status and scope matrices (Appendix D).
- FAQ and troubleshooting – Chapter 23 with questions per process phase and known errors per market and release.
- **Support and escalation** – Report a support case with reference number, market, division and screenshot (Chapter 23.4 and 23.5).
